AC Chat RDS PDP WG 21 September 2016

  Nathalie Peregrine:Dear All, Welcome to the Next-Gen RDS PDP WG Meeting on Wednesday, 21 September 2016 at 05:00 UTC.
  Nathalie Peregrine:If you wish to speak during the call, please either dial into the audio bridge and give the operator the password RDS, OR click on the telephone icon at the top of the AC room to activate your mics. Please remember to mute your phone and mics when not speaking.
  Nathalie Peregrine:Agenda page: https://community.icann.org/x/XQK4Aw
  Nathalie Peregrine:A reminder to please sign into the AC room with your first and last names, as they will be taken for attendance purposes
  Chuck Gomes (RySG):Hello everyone.
  Maxim Alzoba (FAITID):Hello All
  andrew sullivan:Apologies in advance that I will almost certainly have to drop early
  Nathalie Peregrine:Thank you Andrew, noted.
  Vaibhav Aggarwal:namaskar
  Vaibhav Aggarwal::-)
  Vaibhav Aggarwal:yes
  Michele Neylon:trying adobe connect via ipad - I might drop back to phone only ...
  Nathalie Peregrine:noted
  Michele Neylon:the irony of me not having an internet connection is not lost on me
  Lisa Phifer:I think the point is individual data elements versus all data elements (as a whole)
  Alex Deacon:I may be over thinking it....
  Lisa Phifer:can you repeat the proposal Chuck?
  Fabricio Vayra:+1
  Beth Allegretti:+1 Alex
  Lisa Phifer:example of a service related to data elements might be WhoWas or RWhoIs
  Michele Neylon:+1
  andrew sullivan:I don't get why rwhois is an example. (Just a quibble -- we don't need to debate I don't think)
  Alex Deacon:Maybe we can put that phrase in square brackets and revisit it after we dive into the specific purposes ?
  Michele Neylon:they're not "core"
  Michele Neylon:i'd agree with Jim
  andrew sullivan:rwhois _is_ core in any thin registry. it's the RDS protocol in that case
  andrew sullivan:but anyway, not a critical point
  andrew sullivan:I don't care which kind of registries we're

talking about

andrew sullivan:we surely don't want this to be tightly wound around other policies

Michele Neylon:I don't think the "type" of registry is relevant

Michele Neylon:we are assuming they're all treated the same

Jim Galvin (Afilias):[[and services related to them, if any.]

Holly Raiche:Why is the RDcollected by registrars under the RAA not covered - or haveI missed something

Lisa Phifer:Note that proposed edits are listed in Notes Pod at right

Maxim Alzoba (FAITID):do we assume that privacy proxy works the same way like now?

Holly Raiche:okay - hanks - ys yes - this is about what is collected in the relationship beween registrars/registries

Holly Raiche:And add - relationship between registrars/registries and ICANN

andrew sullivan:@Maxim: why does that matter? The privacy proxy stuff all happens on registration side

Fabricio Vayra:Suggest that Steve Metaltiz's points from last call be incorporated into "overall goals"

Maxim Alzoba (FAITID):the reason - in case of P&p registry see only generic words about most data

Michele Neylon:Maxim - huh? No you don't

Michele Neylon:the only data that is changed is in relation to the registrant

Jim Galvin (Afilias):The issue with privacy/proxy is whether or not we write the policy to say that we have to know who the registrant is or whether it is an access point.

Maxim Alzoba (FAITID):@Jim +1

Fabricio Vayra:First, having a list of purposes / accommodating multiple purposes. Second something that can be communicated readily to registrants and others. And third, something that you can use to establish a relationship between the stated purpose and a proposed or actual use.

andrew sullivan:@Jim: it seems to me that that policy is not possible, for the very reasons that proxies can't possibly be regulated away despite what people would like

andrew sullivan:and there's been a complicated set of rules about that

andrew sullivan:I think we're talking about access to registration data as in the registry

Holly Raiche:@ Jom - Is that connected to your earlier question - are we asssuming that we are alking about access - to a tiny bit -to a lot - of data, but not no access a all?

andrew sullivan:worrying about data that is _not_ in the registry is asking for scope creep of indeterminate size

Holly Raiche:Sorry - @Jim

Michele Neylon:We spent about 2 years on privacy / proxy policy - we shouldn't be trying to re-open that

Jim Galvin (Afilias):@andrew - that's what I think and why I'm concerned about the phrase "services related to them".

Holly Raiche:Agree with Michele - PLEASE don't reopen

Michele Neylon:the IRT for PPSAI is kicking off now but the policy has been decided

Fabricio Vayra:@Michele, since when is spending a bunch of time on something a bar to reopening it (just saying --- see present case).

Michele Neylon:lol Fabricio :)

Fabricio Vayra::)

Michele Neylon:bloody lawyers :)

Daniel K. Nanghaka:I agree with it

Holly Raiche:Agree with it

Vaibhav Aggarwal:+1 Michele

Vaibhav Aggarwal::-)

Fabricio Vayra:+1 Alex and Steve

Lisa Phifer:See prerequisites v, vi

Fabricio Vayra:good call, Lisa

Alex Deacon:Yep - I see that now

Holly Raiche:I'm happy with them where they are

Fabricio Vayra:agree with Alex's initial thought as goals

Lisa Phifer:To communicate purpose(s) of the RDS to registrants (and others)

Lisa Phifer:yes, suggested tweak to move from prereq to overall goal

Alex Deacon:I think that would do it.

Alex Deacon:Thanks Lisa....

andrew sullivan:Apologies that I must drop now

Lisa Phifer:Similarly, move vi. to e. To establish sufficient relationship between purpose(s) and use of the RDS

Beth Allegretti:+1 Alex

Fabricio Vayra:+1 alex

Sara Bockey:Apologies but I need to drop as well. Great discussion and thanks all.

Lisa Phifer:Proposed text is now: e. To establish sufficient relationship between the purpose(s) and the use(s) of the RDS

Kal Feher:I'm ok with with the move. but I don't feel strongly one way or another

Fabricio Vayra:I believe that wat Steve pointed out goes to the actual statement of purpose

Fabricio Vayra:+1 Steve

Fabricio Vayra:+1 Alex

Lisa Phifer:How about "the system that may collect, maintain,

and/or provide access to...
   Vaibhav Aggarwal:sale and purchase of Whois data is illegal
right ?
   Michele Neylon:illegal where?
   Vaibhav Aggarwal:everywhere
   Fabricio Vayra:Illegal why?
   Michele Neylon:it's not "illegal"
   Michele Neylon:There are plenty of businesses who trade in it
   Vaibhav Aggarwal:then why registrars cannot solicit business
for swomen Ng that data
   Fabricio Vayra:Michele buys and sells data all the time
   Vaibhav Aggarwal::-)
   Michele Neylon:Fabricio - I do?
   Vaibhav Aggarwal:this is an ICANN directive
   Michele Neylon:what is??
   Vaibhav Aggarwal:oh
   Vaibhav Aggarwal:soliciting business using Whois data
   Vaibhav Aggarwal:chuck since u r verisign can assist me here
please on this perception that I may have
   Michele Neylon:Verisign doesn't have whois data
   Vaibhav Aggarwal:chuck is Rysg so I asked
   Holly Raiche:It's a great time for Sydney
   Kal Feher:Vaibhav you appear to have your mic on
   Vaibhav Aggarwal:so if the data is open then where is the
question of privacy?
   Fabricio Vayra:That woul be unfortunate, Michele
   Vaibhav Aggarwal:then the SOP needs to clearly state this that
this pro is expecting a change in the policy
   Michele Neylon:Fabricio - it shouldn't be an issue
   Michele Neylon:Vaibhav - Fabricio was trolling a bit
   Benny Samuelsen / Nordreg AB:somebody should mute
   Maxim Alzoba (FAITID):Vibhav, please mute
   Fabricio Vayra:you heard it here first, Michele/blackknight
sells PII
   Vaibhav Aggarwal:it is illegal worldwide
   Vaibhav Aggarwal:especially in the U.K. and USA
   Vaibhav Aggarwal:right
   Vaibhav Aggarwal::-)
   Holly Raiche:Maybe email the culprits?
   Vaibhav Aggarwal:ha ha ha
   Michele Neylon:we're criminals now I think
   Vaibhav Aggarwal:I am more than happy to actually partner up
with them
   Vaibhav Aggarwal:partners in crime ;-)
   Fabricio Vayra:thanks!
   Vaibhav Aggarwal:the WG of a few naughty children I'm AKS

Fabricio Vayra:zzzzzzzzzzzzzzzzzzz
Vaibhav Aggarwal:ha ha ha GD bye
Patrick Lenihan:Thanks to Each and All!
Maxim Alzoba (FAITID):bye
Benny Samuelsen / Nordreg AB:Now coffee
