Berry Cobb:WT1 is on 18 Oct @ 15 UTC

Jeff Neuman:Dennis Chang

Jeff Neuman:ICANN staff

Sara Bockey:That would be great!

Jeff Neuman:BRG = Brand Registry Group

Jeff Neuman:But its fun too ;0

Michael Flemming:Light hands make light work!

Michael Flemming:Its also very exciting!

Michael Flemming:Loud and clear!

Quoc Pham:I am from WT4 :)

Emily Barabas:next sub team 4 meeting Thursday, 27 October 2016 at 15:00 UTC

Steve Chan:The session at ICANN57 runs from 13:45-18:30 local time and you can find details here:

Sara Bockey:here is the text for the proposed topics:

Sara Bockey:What went wrong with the Applicant Support Program in the 2012 round and is there still a need for such a program?

Sara Bockey:Some have stated that a Pre-Approval or Accreditation process would be beneficial for registries and registry service providers. Is this an accurate assessment? If so, how should such a process be set up?

Michael Flemming:Sorry for being so fast. Here are the topics we are looking at as teaser topics.

Justine Chew:Attending remotely

Emily Barabas:Doodle poll on ICANN57

attendance: [https://urldefense.proofpoint.com/v2/url?u=http-3A\\_doodle.com\\_poll\\_rhbpdwhqf2m6u2u4&d=DQICaQ&c=FmY1u3PJP6wrcrw1l3mSVzgfkbPSS6sJms7xcl4I5cM&r=8\\_WhWIPqsLT6TmF1Zmyci866vcPSF04VShFqESGe\\_5iHWG1BLwwwehFBfjrsjWv9&m=KNaoLBvwTHmR5x83nLJHyI4txWt-hIv1k3xcNfD2D\\_c&s=KbG8A0dMX1Mt\\_6NFVA7iZpdLLOm9qhQs1GRR3pOXgls&e=](https://urldefense.proofpoint.com/v2/url?u=http-3A_doodle.com_poll_rhbpdwhqf2m6u2u4&d=DQICaQ&c=FmY1u3PJP6wrcrw1l3mSVzgfkbPSS6sJms7xcl4I5cM&r=8_WhWIPqsLT6TmF1Zmyci866vcPSF04VShFqESGe_5iHWG1BLwwwehFBfjrsjWv9&m=KNaoLBvwTHmR5x83nLJHyI4txWt-hIv1k3xcNfD2D_c&s=KbG8A0dMX1Mt_6NFVA7iZpdLLOm9qhQs1GRR3pOXgls&e=)

Karen Day:I think it being Sunday evening in the US coupled with the middle of the night in europe our attendance is very light today

Emily Barabas:it's not too late to add your response!

avri doria:5 am in Central Europe and S. Africa (where i am)

Michael Flemming:1. Is a single agreement still suitable for the needs of subsequent procedures? Noting that the 2012 round saw the introduction of TLDs with needs that differ from the standard ICANN model, the idea of different agreements suited to a specific category has seen increased demand. Do we need to consider allowing for category based agreements and what is the justification for such? If yes, in what ways could we consider a "category based agreement"? Or, how should the single base agreement address the various needs of different categories?

Michael Flemming:Not in relation to this topics

Michael Flemming:topic\*

Michael Flemming:2. For Reserved Names, what is a reserved name and what are the reserved names per the RA? Do any changes need to be made to the reserved names to reflect the changes in recent processes that allow for the release of such reserved names?

Michael Flemming:3. In the 2012 round a Continuing Operations

Instrument was required to be submitted in the form of a Letter of Credit to fund an Emergency Back End Registry Operator. That requirement proved to be difficult for a number of registries to meet. What other options are there to fund the EBERO functions? Also, some registries, such as Brand TLDs, consider that a Continuing Operations Instrument is not required due to the nature of their TLD. This spans into the background of EBERO requirements, as well, but would the Continuing Operations Instrument be required for TLDs that would qualify for an exemption to the Code of Conduct for the RA?

Michael Flemming:The above are the 3 topics WT2 is looking at exploring for ICANN57.

Martin Sutton:The questions were posed to SO/ACs but many registries are not members of the RySG or other groups, particularly dotBrands, should these questions be sent directly to registry operators?

Martin Sutton:more general question.

Martin Sutton:Agree it could be possible to define restrictions to avoid gaming, particularly for dotBrands

Martin Sutton:and could provide opportunities for ICANN to move ahead with smaller, distinct application rounds to maintain momentum before continuous cycles.

Martin Sutton:sure

Cecilia Smith:agreed

Jeff Neuman:Is everyone losing Avri

Justine Chew:I can hear Avri very well

Martin Sutton:no

avri doria:i can hear you but you can't hear me

Karen Day:I heard avri, but not jeff

Mary Wong:Some of us lost Avri briefly (or broken up) but all seems to be working now

Michael Flemming:I can

Mary Wong:Yes

Martin Sutton:yes

Justine Chew:I can still hear you, Avri

Mary Wong:We can hear you

Christopher Niemi:I hear Avri

Quoc Pham:yes i can hear you

Karen Day:I hear Avri

Sara Bockey:Avri - you are faint and breaking up on my end

Karen Day:Jeff is breaking up

Justine Chew:Nope, I'm on Adobe and I can hear both Avri and Jeff

Michael Flemming:Everyone is loud and clear

Mary Wong:All, please note that, in general, the phone bridge is more stable for audio than AC

Mary Wong:Yes  
Quoc Pham:yes  
Michelle DeSmyter:yes  
Justine Chew:Yes, Jeff  
Martin Sutton:same comment as you Avri - there is still the potential for 10k+ applicants, even with short windows  
avri doria:my question. if we start from day 1 with this alternate procedure, will that even out the pent up demand or will we still have a first rush of 10k applications. is there any way to determine this?  
Martin Sutton:but there could be limits applied, potentially  
Jeff Neuman:yes  
Justine Chew:Karen has her hand up  
Martin Sutton:I am on mute, household is sleeping!  
Michael Flemming:Lost Karen  
Justine Chew:Yes, Karen, please carry on  
avri doria:i am hearing her , though it breaks up.  
Jeff Neuman:i joined on phone  
Karen Day:Could we do first come first served w/in the 3 mo window??  
Karen Day:No in favor  
avri doria:my connectivity is bouncing up and down.  
Michael Flemming:can you hear me?  
Karen Day:Not\* in favor of that proposal  
Sara Bockey:Yes, hear you  
avri doria:i can hear  
Karen Day:We'd make a great Verizon commercial ;-)  
Michelle DeSmyter:yes  
Mary Wong:I'm on AC audio and can hear you, Jeff  
Cecilia Smith:We can hear you, Jeff  
Sara Bockey:Yes, I hear you from AC  
avri doria:i can hear but can't seem to talk  
Martin Sutton:so if an applicant applied for 5000 TLDs immediately, would that be reasonable? or should limits be applied to manage capacity and objection processes  
avri doria:saw Klaus's hand at one point.  
Klaus Stoll:Avri, I was able to make my point  
avri doria:sorry guess it came during one of my dropped moments.  
avri doria:i can't seem to talk though.  
Jeff Neuman:Avri, I can take over  
Michael Flemming:Am I still talking?  
Klaus Stoll:yes  
Michael Flemming:Connection is bad  
avri doria:back at least for a moment  
Klaus Stoll:No, this connection does no good for communication

avri doria:i think other people are waking up in the hotel and starting to share the bandwidth

Emily Barabas:Monday, 24 October 2016 at 20:00 UTC for 60 minutes -- next meeting

Steve Chan:Nothing from me

Karen Day:Goodnight, all!

Sara Bockey:thanks all

Martin Sutton:thank you Avri, Jeff et al

Cecilia Smith:Thanks and good night!

Justine Chew 2:After 1+hour of good connection, I have completely lost audio now. Sigh, Catch up in Hyderabad remotely then.

Christopher Niemi:Thanks

Vaibhav Aggarwal:Good bye
