Amy Bivins: (11/7/2016 09:02) Hi everyone, we will get started in a moment

Stacie: (09:02) Great, thank you for the update Amy

Amy Bivins: (09:03) Hello, my name is Amy Bivins and I will be monitoring this chat room. In this role, I am the voice for the remote participants, ensuring that they are heard equally with those who are "in-room" participants. Please note that I will only be able to read your comment/question within the time set by the Chair of this session; I will not be able to read your comment or question on the mic if they are sent after the session/subject is closed by the Chair

Amy Bivins: (09:04) o The chat rooms are the virtual meetings for everyone, in-room and remote. When submitting a question that you want me to read out loud on the mic, please start with a <QUESTION> and end with a "</QUESTION>". Text outside these quotes will be considered as part of "chat" and will not be read out loud on the mic

Bridge Song@Alibaba Cloud: (09:10) Hi Amy, no video signal here

Amy Bivins: (09:10) Hi, I will check with IT on this

Bridge Song@Alibaba Cloud: (09:11) Got, thanks

Rubens Kuhl: (09:11) I'm getting the presentation feed just fine. Firefox seems to be browser getting better results with the new ICANN Adobe Connect installation.

John McCormac - HosterStats: (09:12) Can see the slides but there's no video.

Amy Bivins: (09:12) John and Bridge, I'm running the slides from my desktop and this room so it may be too late to start video but I am having someone check on this

Bridge Song@Alibaba Cloud: (09:14) Video comes out now, thanks, Amy

Robert Guerra/SSAC: (09:15) The comment/chat box is far too small. Can you please make the slide window a bit smaller please

Amy Bivins: (09:16) Hi Robert and everyone, we are working on this, just a moment please

Denise Michel: (09:22) I don't see the current report linked on the session page. Could you please share it?

Amy Bivins: (09:22) Hi Denise, I can share it immediately after the session--it's running my desktop so I can't toggle over to get the link

Andy Simpson: (09:23) https://urldefense.proofpoint.com/v2/url?u=https-3A__www.icann.org_en_system_files_files_gtld-2Dmarketplace-2Dhealth-2Dindex-2Dbeta-2D19jul16-2Den.pdf&d=DQIFaQ&c=FmY1u3PJp6wrcrwll3mSVzgfkbPSS6sJms7xcl4I5cM&r=uerz4ckt1v4Qhbv-TplkjKTey9bgtdWrvLyZDu0mXuk&m=s6EdfEcwIv9HwN8x1RBXwdCYVJX3pClVe8BUUsDdrgI&s=z1rh_Y25ctWqH5_E8LNn__Q0icyhBRvSjMXc9sqFtD4&e=

Amy Bivins: (09:23) Thank you, Andy!

Rubens Kuhl: (09:25) <COMMENT>ccTLD organisations such as CENTR, APTLD, LACTLD and AfTLD. track a subset of the metrics of this index and could contribute to a broader view of the domain industry. </COMMENT>

Amy Bivins: (09:25) Thank you, Rubens! I will share this comment on the mic shortly

John McCormac - HosterStats: (09:27) <comment>The issue with ccTLDs is that the domain name market at a country level is quite different to that at a registrar or global level. Resellers/hosters play a far more important part in country level markets. Some countries do not even have accredited ICANN registrars but still have vibrant gTLD/ccTLD markets.</comment>

Denise Michel: (09:27) Thanks

Rubens Kuhl: (09:30) Google lists (https://urldefense.proofpoint.com/v2/url?u=https-3A__support.google.com_webmasters_answer_62399-3Fhl-3Den-26rd-3D1&d=DQIFaQ&c=FmY1u3PJp6wrcrwll3mSVzgfkbPSS6sJms7xcl4I5cM&r=uerz4ckt1v4Qhbv-TplkjKTey9bgtdWrvLyZDu0mXuk&m=s6EdfEcwIv9HwN8x1RBXwdCYVJX3pClVe8BUUsDdrgI&s=bN-G9spCjZ5Tg47TGrtYhEMJkkGs54khI5INH54U7Oc&e=) the following ccTLDs as operating in a generic non-country-targeted fashion: .ad.as.bz.cc.cd.co.dj.fm.io.la.me.ms.nu.sc.sr.su.tv.tk.ws

Stacie: (09:34) This doesn't have to be a question for the pannel if anyone on this chat can answer the question - did I hear a pannelist say these data could be put online in some sort of a a data bank/resource for the community to use?

Stacie: (09:34) sorry, my connection cut out so I'm a bit behind

Robert Guerra/SSAC: (09:35) ICANN having a chief scientist or chief statistician is a great idea

Stacie: (09:35) +1

Robert Guerra/SSAC: (09:35) <comment> ICANN having a chief scientist or chief statistician is a great idea<comment>

Amy Bivins: (09:36) Hi, Stacie, the data from the beta report was published in July, but the underlying data is not currently posted (but is a compilation of predominantly publicly-available data)

Stacie: (09:36) great, thank you Amy!

Amy Bivins: (09:36) There is a link earlier in the chat or I can send it to you afterward (available at icann.org/progress under Goal 2.3)

Phil Buckingham: (09:38) Hi amy , my audio is in and out

Stacie: (09:38) I have the earlier link, much appreciated

Amy Bivins: (09:39) Hi Phil, I'll check with tech support--you might want to try re-connecting

Phil Buckingham: (09:41) thanks Amy - i have done - much better !

Kurt Pritz: (09:45) I wish to voice my agreement with Jonathan's and Jay's point that ICANN establish a new department focused on data collection and analysis headed by a competent data scientist. For years, ICANN's decision-making processes have been data starved, mainly due to lack of financial resources. If one thinks of ICANN's core competencies, one should be to be a leader in date access and analysis. With sufficient budget, ICANN can now become an industry leader in this area.

Kristine Dorrain: (09:46) +1 Kurt.

Stacie: (09:47) @Kurt +1

Phil Buckingham: (09:50) Denise +1 re bricks

John McCormac - HosterStats: (09:51) <comment>It looks like a set of mutually dependent but exclusive parameters (trust/usage/development/stats). A single figure or index might not work well.</comment>

Amy Bivins: (09:58) Hi, All, I will read your comments as soon as they turn it over to me--Kurt, did you intend your comment to be read aloud?

Phil Buckingham: (10:00) Exactly JZ - what are we to trying to measure here - against what base

Robert Guerra/SSAC: (10:15) great session. thank you.

Justine Chew: (10:15) Very useful session, many thanks.

Amy Bivins: (10:15) Hi, All--I am going to share these with the panel tomorrow in the morning and we will continue to discuss. Thanks so much for your participation!
