I. Background

On 8 November 2012, the ICANN Board approved a series of improvements to the manner in which ICANN carries out its responsibilities for WHOIS (the current gTLD registration data directory service), in response to the recommendations of the WHOIS Review Team convened under the Affirmation of Commitments (AoC). The AoC states:

9.3.1 ICANN additionally commits to enforcing its existing policy relating to WHOIS, subject to applicable laws. Such existing policy requires that ICANN implement measures to maintain timely, unrestricted and public access to accurate and complete WHOIS information, including registrant, technical, billing, and administrative contact information. One year from the effective date of this document … ICANN will organize a review of WHOIS policy and its implementation to assess the extent to which WHOIS policy is effective and its implementation meets the legitimate needs of law enforcement and promotes consumer trust…

This Report highlights how ICANN is fulfilling the Board’s mandate in response to the recommendations of the WHOIS Review Team, and provides insight into the work ahead as ICANN executes its Action Plan for improving WHOIS.

II. WHOIS - A Strategic Priority for ICANN

In his opening remarks at the ICANN Toronto meeting, Fadi Chehadé introduced the key areas of focus for his tenure as ICANN’s new President and CEO. His “Fadi Sets the Course” speech announced to the
world his vision for tackling ICANN’s toughest issues, including WHOIS. Undeterred by the decade’s long deadlock in the Community for how to fix it, Chehadé assured the ICANN Community that “[w]e must look at this. We must look at this with integrity, with seriousness, and address it once and for all ....”

The Toronto Meeting marked the start of a series of improvements to WHOIS that continue today. With a highly effective team of executives charged with bringing these improvements to fruition, WHOIS is being transformed to become a more useful instrument for maintaining a healthy Internet ecosystem.

III. New Contracts Accelerate Change

In early 2013, ICANN hosted several CEO Roundtable Events and other meetings, at which Chehadé shared his views with the top executives of registries, registrars, and others, about the direction of the DNS industry. He announced that the Domain Name System — and the Industry that has grown up around it — are at an inflection point. With the introduction of new gTLDs and the vertical integration of the DNS value chain, Chehadé urged the leaders within the DNS ecosystem to be ready to meet the challenges ahead. This included the need to evolve the frameworks that govern relationships among DNS industry participants.

Registries and Registrars stepped up to the challenge and backed new obligations for inclusion in their contacts that are designed to improve the effectiveness of WHOIS.

After almost two years of intense negotiations, the negotiations between ICANN and the Registrars on a new form of the Registrar Accreditation Agreement (RAA) concluded. The Registrar Negotiating Team committed to significant new obligations to improve the effectiveness of WHOIS. The new 2013 RAA adopted by the ICANN Board on June 27th introduced the following improvements:
The obligations under the new 2013 RAA apply to all registrars seeking to serve registries created through the New gTLD Program. Eventually, all registrars will move to the 2013 RAA.

Registries similarly accepted improvements to their WHOIS obligations, as reflected in the base agreement for new gTLDs as well as renewal agreements for existing gTLDs (.info, .biz and .org).

Collectively, these contract revisions are expected to accelerate improvements in the accuracy rates and overall reliability of the WHOIS system.
IV. Debut of the WHOIS Website- Phase I

The WHOIS Review Team emphasized the importance of conducting outreach to educate users and registrants about WHOIS, and specifically, the requirements to maintain accuracy. The Review Team also highlighted the need to consolidate all aspects of the WHOIS policy into one location, and to simplify the process for conducting WHOIS searches. To address these needs, ICANN designed and developed the new WHOIS Website, which is now in its beta launch.

ICANN invites the public to peruse the WHOIS Website Beta, test its features, and provide feedback on what additional content may be desirable. Published in six languages, the WHOIS website is designed to be a one-stop-shop for those seeking information about WHOIS.

V. Future Enhancements to the WHOIS Website

Phase I of the WHOIS Website assembled all the key documents, policies and information into a single location, to simplify identification of the policies, procedures and specifications applicable to WHOIS.
WHOIS Improvements 2013 Annual Report

Subsequent phases of the [WHOIS Website](#) in development today will include a centralized look-up tool where WHOIS searches can be conducted for all gTLDs, and periodic statistical reports on the accuracy of WHOIS. These additional features should greatly reduce the difficulties faced by those accessing WHOIS records today, and provide the ICANN Community with transparency into whether accuracy levels of WHOIS records improve over time.

**VI. Enhancing Contractual Compliance Function**

The Contractual Compliance Department continues to contribute to ICANN’s overall efforts to improve WHOIS. The streamlined processes implemented over the last year, combined with the enhanced resources dedicated to this effort, have reduced the time associated with addressing and resolving WHOIS inaccuracy complaints, and have resulted in a greater collaboration with registrars.

Highlights of the Compliance Department’s activities include:

<table>
<thead>
<tr>
<th>Accomplishments</th>
</tr>
</thead>
<tbody>
<tr>
<td>Automation of Compliance Processes - Faster Results</td>
</tr>
<tr>
<td>• WHOIS Inaccuracy Complaints – Less Than 25 Days from 65 Days</td>
</tr>
<tr>
<td>Improved Processing Quality - Fact Based Decisions</td>
</tr>
<tr>
<td>• Proof of Registrar “Reasonable Steps” Taken to Investigate a WHOIS Inaccuracy Complaint</td>
</tr>
<tr>
<td>Improved User Experience with Guidance</td>
</tr>
<tr>
<td>• WHOIS Inaccuracy Information and FAQs in 6 UN languages</td>
</tr>
<tr>
<td>• Feedback Sought for Continuous Improvement</td>
</tr>
<tr>
<td>• Pulse Survey E-Mailed at the Closure of a Complaint</td>
</tr>
<tr>
<td>Additional features for WHOIS Inaccuracy Complaints</td>
</tr>
<tr>
<td>• Multiple Complaints on One Form</td>
</tr>
<tr>
<td>• Bulk Submissions</td>
</tr>
<tr>
<td>Successful completion of Year-1 Audit Program</td>
</tr>
<tr>
<td>• Including, Examining WHOIS Inaccuracy Responses by Registrar</td>
</tr>
</tbody>
</table>

More details on the activities of the Compliance Department are available in its [monthly updates](#), [annual reports](#), and [community outreach](#) presentations. Today, the ICANN Community has
greater access to reports and information than has ever been made public before, through the compliance metrics reported through [https://myicann.org/compliance](https://myicann.org/compliance).

Here are a few examples of these reports:

Myicann.org also provides easy access to statistics regarding the volume of WHOIS complaints handled and the nature of enforcement actions undertaken against registrars:
VII. Details, Milestones & Deliverables

ICANN’s Action Plan includes numerous commitments to address the recommendations of the WHOIS Review Team as presented in its Final Report. A cross functional team led by ICANN’s Strategic Initiatives Department is working closely together to meet and exceed these commitments. The latest details on the activities surrounding this project, including implementation activities, milestones and key deliverables, are included in the chart posted in Annex A.

VIII. Call for Community Involvement

Some improvements sought by the WHOIS Review Team require collaboration and policy development from the ICANN Community, especially in the areas of internationalized registration data. ICANN’s bottom-up multi-stakeholder approach to policy-making brings together affected stakeholders to develop necessary changes to WHOIS policy and implementation for these important issues.

Today, policy work targeting WHOIS reform continues through the many volunteers sharing their expertise to contribute in the following topics:

- GNSO Thick WHOIS Policy Development Process (PDP)
- GNSO PDP on Privacy and Proxy Accreditation Issues
- GNSO PDP on Translation/Transliteration of Registration Data
- Expert Group on Internationalized Registration Data

The policies and recommendations arising from these processes will inform ICANN’s future reforms to the WHOIS system.

IX Next Generation of Directory Services

In addition to initiating widespread reforms to WHOIS, the ICANN Board’s mandate in November 2012 launched a parallel effort to help resolve the nearly decade-long deadlock within the ICANN Community on how to
replace the current WHOIS system, which the WHOIS Review Team noted is widely regarded as “broken.” The Expert Working Group’s (EWG) mandate is to reexamine and define the purpose of collecting and maintaining gTLD directory services, consider how to safeguard the data, and propose a next generation solution that will better serve the needs of the global Internet community.

On 24 June 2013, the EWG published its Initial Report, Frequently Asked Questions, and an online questionnaire, and kicked off an extensive consultation process within the ICANN Community on its initial recommendations. When the EWG concludes its deliberations with the delivery of its Final Report, the ICANN Board will evaluate its recommendations and consider the next steps for this work. This is expected to include follow-up policy work for the GNSO.

- waiver of data retention obligations due to conflicts with local privacy laws (as set forth in the Data Retention Specification)
- Ongoing collaboration with a registrar working group to identify feasible tools for registrar validation of Whois data
- Updates to the Registrar Data Escrow arrangement with Iron Mountain to take into account the new requirement to escrow the underlying customer data of Whois proxy and privacy services

- ICANN Blog Regarding Registrar Outreach on New 2013 RAA events 19 Sept 2013
- Beijing Outreach to Registrars from Compliance Dept. 6 April 2013
- North America Registrar Meeting held on 22 and 23 August 2013 in Los Angeles, USA
- Asia Pacific Registrar Meeting held on 26 and 27 August 2013 in Xiamen, China
- European Registrar Meeting held on 23 and 24 September 2013 in Berlin, Germany
- Updated Complaints
- Additional information available on other Compliance Dept. recent outreach activities
- Implementation of Communications Plan to commence with the WHOIS Website

- Announcement of Vice President of Compliance reporting to the CEO- 14 Sept 2012
- Migrated internic.org complaints to icann.org - June 2013
- Completed automation of complaints process - June 2013
- Pilot testing bulk Complaints submission process - July 2013 thru October 2013; Completed, evaluated and will resume in production 1 November 2013.
- Added Pulse Survey in complaint closure email to both the contracted parties and the reporter (complainant).

- Monthly Compliance Updates published on icann.org
- Monthly reporting of compliance related metrics through myicann.org
- ICANN Durban 47 Session on Contractual Compliance Update highlights WHOIS results
- Updated Complaints submission processes to address new 2013 RAA requirements – 31 Oct 2013
WHOIS Improvements 2013 Annual Report

New 3 year Compliance Program to focus on key registrar/registry obligations, including WHOIS

Compliance Staffing levels have increased substantially and resources allocated to additional headcount

√ Compliance 2012 Annual Report published – 3 February 2013
   ○ Future Annual Reports to be published on an annual basis

√ Launched a three-year Audit Program:
   ○ Year 1 launched Sept 2012
   ○ 2012 Compliance Year One Audit Report Published 25 June 2013
   ○ Second Year of audit Program under way – due November 2014
   ○ Three Year Audit Program to be completed by November 2015

√ Additional Compliance Dept. recent outreach activities

√ Current Staff counts: 18 Staff members, covering the following languages: Arabic, English, French, Hindi, Korean, Mandarin, Russian, Spanish, Turkish, Uzbek, German and Urdu

√ Compliance Staff levels published and updated regularly
   ○ For FY14, the Compliance Department has approval to add one additional head-count, and is planning through these positions to establish global presence in ICANN’s hub offices

Data Accuracy

5

WHOIS requirements for accurate data widely and proactively communicated

See answers to #3 & 10.
Staff developed a WHOIS Informational Website to
   • Provide historical record of WHOIS
   • Consolidate WHOIS policy documentation
   • Provide mechanisms to teach people how to use WHOIS
   • Provide mechanisms for people to submit complaints as they relate to WHOIS data
   • Direct people to the appropriate channels to become engaged in the community on WHOIS related topics
   • Educate registrants on WHOIS, their rights and responsibilities
   • Provide a Knowledge Center where key WHOIS related documents can be located

See answers to #3 & 10.
√ FY14 Budget request includes funds for development of WHOIS Informational Website & WHOIS Search Portal
√ Completed requirements gathering for WHOIS Informational Website – July 2013
√ Development of WHOIS Informational Website – July – Oct 2013
√ Beta Launch for WHOIS Informational Website – (Oct 2013)
   ○ Public launch of WHOIS Informational Website – (Nov 4 2013)
   ○ Public Launch of foreign translations of WHOIS Informational Website (4 Nov 2013)
   ○ Communications Plan kick-off for roll-out of WHOIS Informational Website (Nov 2013)

6

ICANN should take appropriate measures to reduce the number of WHOIS registrations that fall into the accuracy groups “Substantial Failure

To address this recommendation, the Board directed the CEO to:
1) proactively identify potentially inaccurate gTLD data registration information in gTLD registry and registrar services, explore using automated tools, and forward potentially inaccurate records to gTLD registrars for action; and
2) publicly report on the resulting actions to encourage improved accuracy.

See answers to #7 & 11 below for information on the statistics on accuracy to be gathered in connection with the new WHOIS Search Portal
## WHOIS Improvements 2013 Annual Report

| 7 | Annual WHOIS accuracy reports | Staff developing a WHOIS Accuracy Sampling and Reporting System using the methodology of the NORC Study  
To accomplish the requested analysis, Staff’s work is focusing on:  
1. Statistical methodology  
2. Access to WHOIS records  
3. Parser to automate contact data extraction  
4. Automated address verification  
5. Call center to call all sampled records. | ✓ Completion of preliminary assessment of implementing a statistical analysis program (2013)  
✓ Evaluation of costs associated with telephone validation, using businesses in the identify verification businesses (15 September 2013)  
○ Review proposals from outside vendors to conduct statistical reporting Oct/Nov 2013  
○ Select vendor & contract for statistical reporting – estimated 15 Dec 3013  
◊ Development of systems to gather the data needed to perform the statistical analysis and record verification and validation methodology along with estimated costs (date to be determined (TBD))  
◊ Publish initial annual accuracy report (date TBD), and updates annually |

| 8 | ICANN should ensure that there is a clear, unambiguous and enforceable chain of contractual agreements | See answers to #1.a above.  
New 2013 RAA includes additional enforcement provisions and sanctions applicable to registrars, registrants, and resellers with regards to WHOIS.  
New gTLD Registry Agreements include enhanced WHOIS obligations
