5114887520	11/28/2016	I do not support any of these recommendations.	We believe the issue only concerns the communities represented by any geographical denomination. To this respect, we believe the only way out of this debate is through GAC advice. Countries should be consulted by any interested party for the commercial use of geographic names.
5114877282	11/28/2016	I do not support any of these recommendations.	I support 1. I do not believe that harmonized framework is achievable nor should it be a goal on its own - what is harmonized framework? Harmonized with what exactly? Which framework - cctld, gtld, geotld?. The first step should be working out if and how would it be possible to release 3 letter ISO country codes and country names and only then would it be possible to see if there is some way to harmonize this with something.
5114634551	11/28/2016	I abstain from voting on these recommendations.	Being a subject expert on this and not representing any stakeholder I abstain from voting. However, witnessing the discussion I agree with the spirit of these recommendations.
5114605637	11/28/2016	I support all of these recommendations as written.	
5114539105	11/28/2016	I abstain from voting on these recommendations.
