Eleeza Agopian: (08:23) Jonathan did you say Rec #1 on data analysis is now high instead of prereq?

Jean-Baptiste Deroulez: (08:24) 34

Pamela Smith 2: (08:24) Start with #34

drew: (08:25) i Need 5 minutes before I'll be in front of my computer

Waudu: (08:31) INTA is in a better position since they control/influence their members - I think

Jonathan Zuck: (08:32) Still very few respondents on INTA survey

Waudu: (08:33) If INTA gets few responses ICANN is unlikely to do better..

Jordyn A Buchanan 2: (08:38) Making 38 high priority is consistent with what we've done with other recurring studies

Jordyn A Buchanan 2: (08:41) I agree Laureen's mail restatement

Eleeza Agopian: (08:44) Nielsen is conducting the survey for INTA

Waudu: (08:44) @Eleeza. That's great. That should mean they can do it for ICANN as well

Margie Milam: (08:50) we lost Jordan

Waudu: (08:50) So how do you word it? Complete review of TMCH or REview Review of TMCH...

Eleeza Agopian: (08:51) Just a note that a revised version of the TMCH Review will be published in the next week.

Eleeza Agopian: (08:51) and has been shared with the RPM PDP WG.

Pamela Smith 2: (09:08) Thank you, Kaili.

Calvin Browne: (09:14) back .....

Pamela Smith 2: (09:15) Laureen, #42?

Eleeza Agopian: (09:19) I don't see a 2nd recommendation in Dejan's paper.

Gaongalelwe Mosweu (PC): (09:19) Colleagues, I will have to drop out of the call in 15 minutes. I will catch up later.

Eleeza Agopian: (09:21) Here is the language from the end of recommendation 45: Also, future registrants' and consumers' surveys should include more data regarding collection and processing or sharing personal data.

Eleeza Agopian: (09:29) Is 47 a prerequisite?

Eleeza Agopian: (09:30) thank you

Waudu: (09:32) I prefer wording "to confirm" familiarity rather than to "look for". Also study impact of the increased familiarity

Waudu: (09:33) confirm increase in familiarity

Calvin Browne: (09:36) low priority

Calvin Browne: (09:37) agree with this being a low priority
