    Kavouss Arasteh:Pls kindly advise to dial me up
    Kavouss Arasteh:Pls kindkly advise to dial me up
    Kavouss Arasteh:Kavouss
    Kavouss Arasteh:Pls kindly advise for dial up
    Kavouss Arasteh:Dear Stve
    Karen Day:avri you are very very quite
    Kavouss Arasteh:It is a headacke to attend this meeting$
    Steve Chan:Kavouss, Michelle is having some AC issues. I've just let her know to provide you with a dial out.
    Vaibhav Aggarwal, NCSG:Hello Team
    Vaibhav Aggarwal, NCSG:Greetings
    Kavouss Arasteh 2:PLS PLS SPEAK SLOWLYT
    Vaibhav Aggarwal, NCSG:Excellent Point
    Vaibhav Aggarwal, NCSG::-)
    Kavouss Arasteh 2:NOISE
    Jeff Neuman:Sara, we will come back to you
    Jeff Neuman:Michael?
    Jeff Neuman:yes
    Vanda Scartezini:good morning from LA. I can stay just half hour - I am here fro an ICANN regional meeting that will start in half hour
    Jeff Neuman:Terms of Use
    Jeff Neuman:for the Application
    Kavouss Arasteh 2:Terms and Conditions on what pls ?
    Jeff Neuman:Module 6 of the Applicant Guidebook
    Kavouss Arasteh 2:Then we should say that
    Sara Bockey:i hear a fax
    Jeff Neuman:This has been a test of the emergency broadcast system
    Rubens Kuhl:Karen, you need to rewind a little.
    Jeff Neuman:Someone is breathing heavy on the phone
    Robin Gross:sounds good, thanks!
    Susan Payne:thanks!
    Kavouss Arasteh 2:I prefer e-mail. I have difficulties to read Google Doc.
    Jeff Neuman:nope
    Jim Prendergast:yes

Phil Buckingham:If WT2 participants could fill out the doodle poll on a suggested time change (after our next call 2 February) - that would be much appreciated. . Michael and myself would prefer a later time than the current 20.00 UTC - up to 24.00 UTC on alternate Thursdays . Please put you suggestions to the list ..Thks .

Kavouss Arasteh 2:May we take it Pra. by Pra. pls

Jon Nevett:The application fee question seems to be pretty leading imo

Vanda Scartezini:agree

Kavouss Arasteh 2:What is the criteria to decide or identify who is middle applicant

Vanda Scartezini: yes Kavouss - i will need to leave for another meeting here in ICANN - will read it later on. have a productive meeting

Phil Buckingham:so is the cost (recovery) to be flexed according to the number of applications ?

Phil Buckingham:it is a cart before the horse scenario

Sara Bockey:Sure, no problem

Jon Nevett:take out the givens

Jon Nevett:but happy to do it offline

Jon Nevett:sounds good

Jon Nevett:you got it

Kavouss Arasteh 2:Should there be some sort of periodical review of cost recovery value

Steve Chan:@Jeff, maybe we could ask a question related to Phil's question re: the unknown number of incoming applications?

Rubens Kuhl:I think the recurring fees is more of a deterrance to squatting than application fees, unless they move into 7-digits.

Jeff Neuman:All good questions to add

Trang Nguyen:A reminder that a portion of the $185K was allocated to the risk fund. Whatever the method to be used in the future should consider how the risk fund should be accounted for.

Rubens Kuhl:It seems that part of the users are connected to others with a high delay. Quite possibly the AC to phone bridge link.

Alexander.gay:Please also factor in "abuse": Porfolio applicants will simply form shell companies in "developing countries" to save fees!

Kavouss Arasteh 2:THere is more than one cost recovery model as well as more than one method on how to calculate cost recovery fees

Alexander.gay:The lottery could be BUILT IN by a random number assignment during aplication!

Alexander.gay:*application

Steve Chan:Channeling ICANN legal, I would suggest using a different word than lottery.

Jeff Neuman:@steve....how about "sweepstakes" :)

Vaibhav Aggarwal, NCSG:Shell Companies need to go through Veetting process of the APplicant

Vaibhav Aggarwal, NCSG:that is already part of the process

Vaibhav Aggarwal, NCSG:@jeff :-)

Steve Chan:As long as it's not lottery and is able to be legally supported by ICANN, sure! :)

Rubens Kuhl:Alexander, that can be dealt with by defining registration restrictions that larger operators wouldn't like. If applicant support requires not selling to registrants in OECD countries, (Spec 12 Registration Restrictions, as for Community TLDs), no commercial interest doing so.

Alexander.gay:90

Alexander.gay:In my opinion the period of actual application acceptance doesn't really matter. What matters is that there is sufficient time to create a meaningful application once the deadline is announced!

Donna Austin, Neustar:Application Submission Period may want to include questions about advertising the submission period.

Donna Austin, Neustar:Correct Jeff

Alexander.gay:The portfolio applicants can churn out run of the mill applications within 24h. But if we want MEANINGFUL applications by for example geo entities or communities: They need time to put togeher consensus policy!

Steve Chan:@Kavouss., I've updated the header from "WT" to "Work Track" in the Google document

Vaibhav Aggarwal, NCSG:Appologies have to rush for another meeting. will catch up on the notes :-)

Vaibhav Aggarwal, NCSG:Have a good One

Kavouss Arasteh 2:Avri, are we on section 3 pls

Sara Bockey:Kavouss you are a bit muffled. Can you speak louder?

Steve Chan:Staff will make sure the questions are provided in the same place (e.g., in the table above or in the Annex)

Rubens Kuhl:A possible question would be on possible implementations of community priority. Priority can be different from death warrants for non-community applicants.

Cheryl Langdon-Orr (CLO):comments only open until EOM for WT4

Rubens Kuhl:Tks Kavouss.

Cheryl Langdon-Orr (CLO):BYE

Katrin Ohlmer, DOTZON:Bye, all - see/hear next time.

Sara Bockey:thanks all!
