27 February 2015 - AFAV Meeting Minutes

Dear WG members

Thank you for your participation last Friday.

For your reference, here is the link to the meeting recording
https://icann.adobeconnect.com/p8u0h2npfni/, Access Code: AFAVWG (case sensitive)

Below are the meeting minutes. As always, please feel free to provide your comments, suggestions, or amendments to me.

1. The staff provided the WG a review for the face to face meeting in ICANN52.
2. Per the first item on the meeting minutes from ICANN52, Michele followed up with an update that he had received the notice of starting the WG on Whois Accuracy Specification Review from ICANN staff to the RrSG. He considered that the notice was the official start of the Whois Accuracy Specification Review process.
3. Michele further suggested that since the Whois Accuracy Specification Review may lead to a very different language on Whois address validation in the RAA. He suggested that the WG should pause the current work and wait for the outcome of the review. Other WG members followed this suggestion.
4. James suggested that the meeting minutes from the ICANN52 face to face meeting was an excellent recap of what the WG had achieved so far, and should be incorporated into Whois Accuracy Specification Review process. This suggestion was supported by other WG members.
5. The WG decided to pause the current work and wait for the outcome from Whois Accuracy Specification Review.

Per item #5 above, we will temporarily pause the WG and will not have regular meetings for a few weeks. When it is appropriate to resume the work, I will notify you.

Howard Li (李光皓)
Registrar Services and Industry Relations Senior Manager, APAC
