

AFAV Working Group Weekly Meeting

Jan. 09, 2015

Agenda

- Defining the Working Scope/Structure of WG
- Identify the initial tasks list of the WG

Defining the Working Scope and Structure of WG

- **WG Working Scope (tentative):**
 - Defining the working task list;
 - Identify and discuss possible solutions for issues in the work list;
 - Reach agreement on solution for the issues or reach conclusion for a subject;
 - Draft WG reports according to the discussion.
- **WG Structure:**
 - should there be a registrar chair-person for the WG or someone who could be the lead registrar representative, if not a formal “chair”?)
 - Or utilize ICANN staff as the lead person.

Proposed tasks list of the WG

1. Work on the issue of which countries' addresses should be verified to what level (100% accuracy for all area, or less than 100% accuracy is acceptable, and why?)
2. Work on the issue of data format (ASCII, Non-ASCII/conversion, data field sequence)
3. Work on the issue of pre-registration validation (real-time) vs. post-registration validation
4. Work on the issue of data transmission portal/method, service provider system response time, etc.
5. Work on the issue of validation result feedback/response (success/error/failure/warning)
6. Work on the issue of error/failure/warning handling
7. Work on the issue of report format (success/error/failure)
8. Work on the issue of service agreement arrangement with provider(s)
9. Work on the issue of implementation approach and potential alternative cost structures
10. Work on the issue of compliance and monitoring mechanisms

Thank You!
