

AFAV Working Group Weekly Meeting

Jan. 30, 2015

Agenda

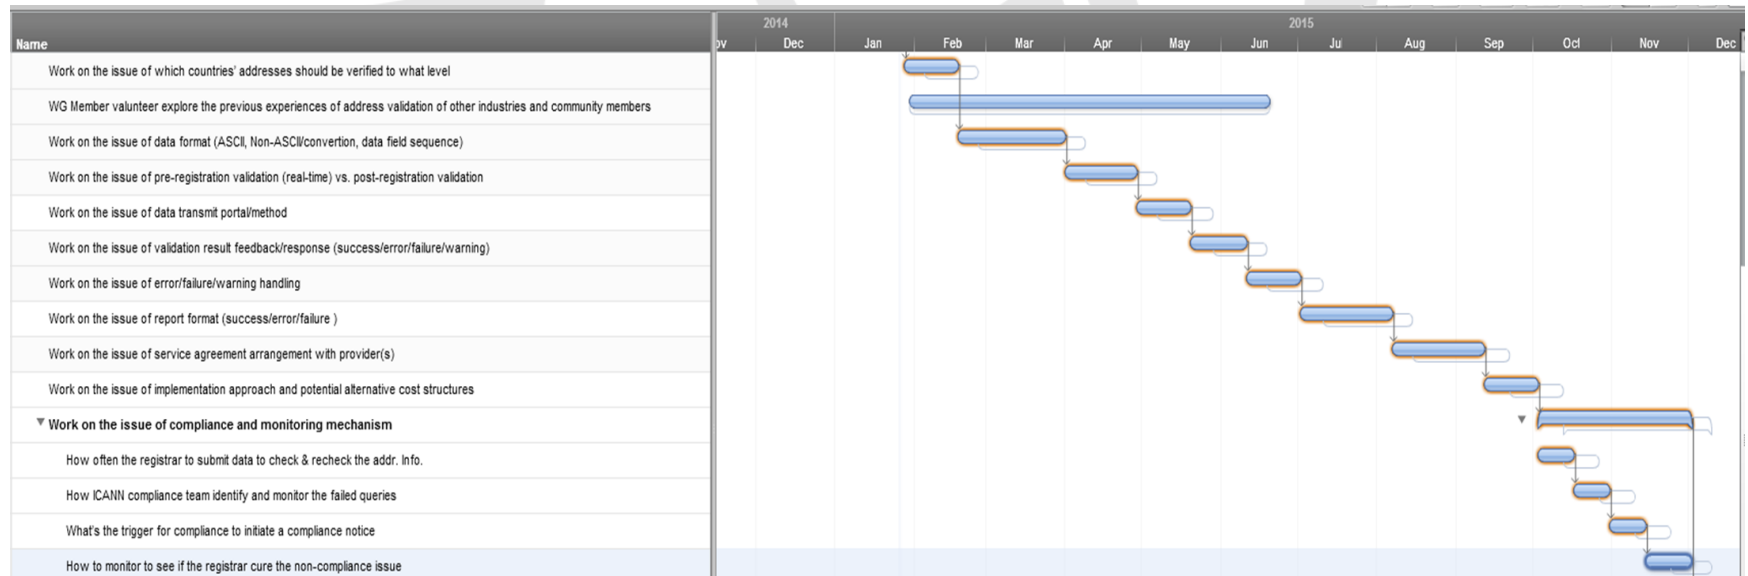

- Finalizing the High Level Principles of the WG.
- Finalizing the adjusted work schedule.
- Call for volunteers to study previous industrial experiences with address validation.
- Voting mechanism for working items.
- First item on the work list: identify what countries and territories address be validated to what level.

High Level Principles of the WG

1. We should agree on an acceptable goal for Error Rate.
2. We should ensure that cross-field address validation should not become a competition barrier to smaller registrars.
3. We should work out the detailed requirements for validation and then to look for tools to match the requirements;
4. We should agree on the sanctions for non-conforming domain names. (Instead of suspension/deletion, perhaps some sort of notification/alert scheme.)
5. We should understand cost implications, and how this will affect registrants.
6. We should have a manageable implementation/enforcement plan.
7. We should ensure that these methods do not run afoul of existing patents.

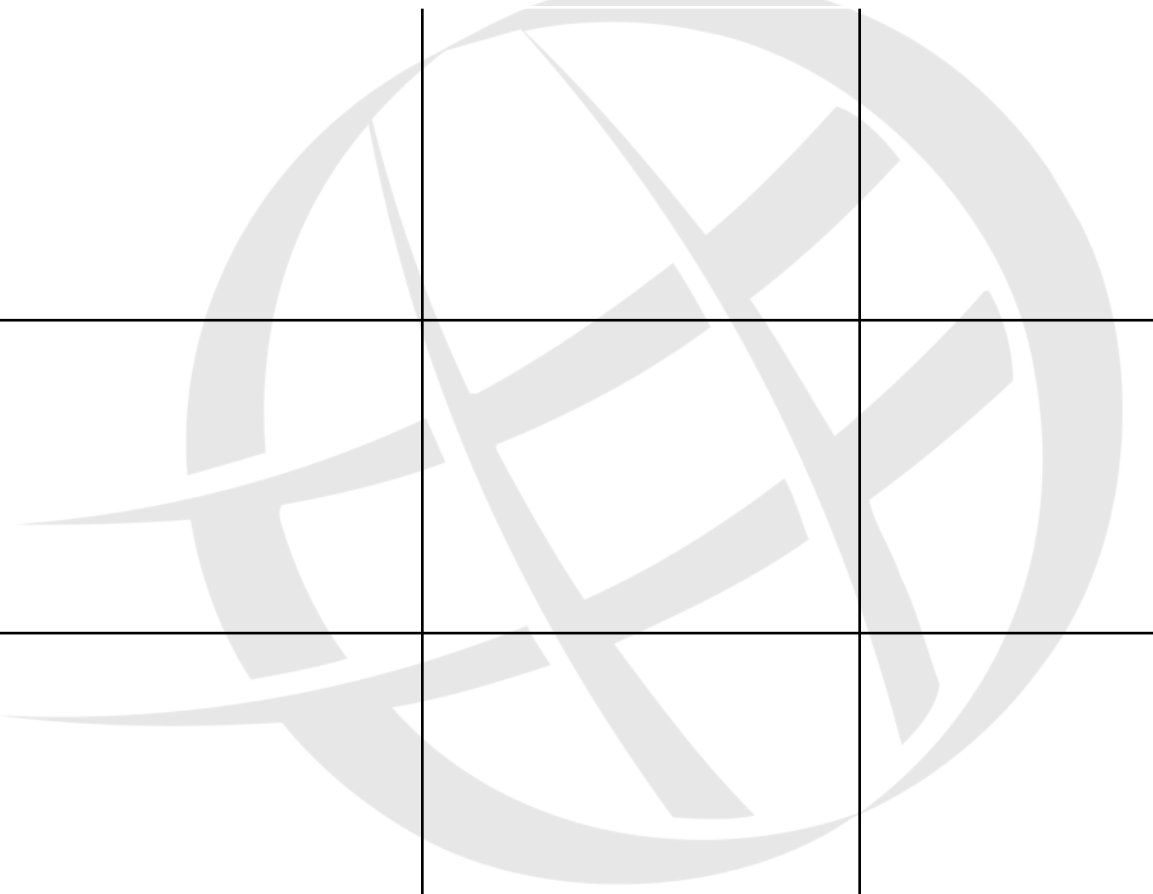

Adjusted Working Schedule

	Task Name	Duration (Working Day)	Start On	Finish On
1	Work on the issue of which countries' addresses should be verified to what level	15 Days	28-Jan-15	18-Feb-15
2	WG Member valunteer explore the previous experiences of address validation of other industries and community members	100 Days	30-Jan-15	20-Jun-15
3	Work on the issue of data format (ASCII, Non-ASCII/conversion, data field sequence)	30 Days	18-Feb-15	1-Apr-15
4	Work on the issue of pre-registration validation (real-time) vs. post-registration validation	20 Days	1-Apr-15	29-Apr-15
5	Work on the issue of data transmit portal/method	15 Days	29-Apr-15	20-May-15
6	Work on the issue of validation result feedback/response (success/error/failure/warning)	15 Days	20-May-15	11-Jun-15
7	Work on the issue of error/failure/warning handling	15 Days	11-Jun-15	2-Jul-15
8	Work on the issue of report format (success/error/failure)	25 Days	2-Jul-15	7-Aug-15
9	Work on the issue of service agreement arrangement with provider(s)	25 Days	7-Aug-15	12-Sep-15
10	Work on the issue of implementation approach and potential alternative cost structures	15 Days	12-Sep-15	3-Oct-15
11	Work on the issue of compliance and monitoring mechanism	40 Days	3-Oct-15	2-Dec-15
12	How often the registrar to submit data to check & recheck the addr. Info.	10 Days	3-Oct-15	17-Oct-15
13	How ICANN compliance team identify and monitor the failed queries	10 Days	17-Oct-15	31-Oct-15
14	What's the trigger for compliance to initiate a compliance notice	10 Days	31-Oct-15	14-Nov-15
15	How to monitor to see if the registrar cure the non-compliance issue	10 Days	14-Nov-15	2-Dec-15

Countries & Territories need to be validated

Validate to State/Province level			
Validate to city/county or district level			
All fields need to validate			
	All C&Ts	UPU S42 compliant C&Ts	Others Categorization (by Region?)

Thank You!
