

1. What framework (structure, process and/or partnership) should be designed and implemented to allow for the disbursement of new gTLD Auction Proceeds, taking into account the legal and fiduciary constraints outlined above as well as the existing memo on legal and fiduciary principles? As many details as possible should be provided, including any implementation guidance the CCWG may have in relation to the establishment of this framework as well as criteria for the selection / ranking of potential funding requests.

Is this considered to be a gating question? I.e. a response to this question will determine the response to the other charter questions?

Are there any sub-questions / does the question need to be further fleshed out?

Is it the expectation that any external input is required to address/answer this question? If yes, what external input may be needed?

Are there any initial CCWG responses?
