COPENHAGEN
11–16 March 2017

Proposed Agenda

- New gTLD subsequent rounds
- Adopting or discussing the implementation plan of the GAC-GNSO CG Final Report
- More substantive discussions on topics within a PDP for which there are different opinions in the community - for example, discussion on geographic names in the context of new gTLDs, so that the input from proposed discussion in Johannesburg can feed into the PDP
- The PDP-generated workload, opportunities for prioritization, slowing the pace to allow stakeholders more space to engage effectively
