

5th SeeDIG Bucharest 7-8 Mai 2019 - Matthias M. Hudobnik

Andrea Beccalli, Roberto Gaetano, Desiree Miloshevic, Matthias M. Hudobnik, Auke Pals, Sandra Hoferichter and Nenad Marinkovic

The 5th South European Dialogue on Internet Governance 2019 was the unique opportunity to meet personalities from governments, science, business, technology and civil society for an inspiring dialogue in Bucharest. Through the SeeDIG conference, I became a profound understanding of this open multistakeholder platform in the respective region. I tried to connect and engage people as much as possible to foster the outreach and engagement activities in my role as EURALO's Co-Chair of the ALAC Sub-Committee on Outreach & Engagement.

Attended panels:

- Opening & Welcoming remarks
- Cybersecurity in South Eastern Europe: how to ensure trust and security?
- Building trust in digital technologies
- (Flash) Digital technologies: a threat or an opportunity for the environment?
- Technical developments in South Eastern Europe
- Are we ready for 5G?
- SEEDIG Cryptoparty
- Dealing with the challenges of online content
- Can endangered languages and scripts be preserved in the digital era?
- Accessible, available and affordable digital technologies for all
- Jobs gained, jobs lost: the future of work and the skills of tomorrow

I acquired diverse knowledge in different aspects of cybersecurity, cybercrime, domain names innovation, human rights, media and content dedicated to the South Eastern European region; especially the contribution of EURALO and their ALS's.

Finally, I would like to thank ICANN for the funding and the great opportunity to attend this very interesting and very well organized event!

Kindest regards,
Matthias M. Hudobnik
