Second Security, Stability, and Resiliency Review (SSR2)

Public Consultation

12 March 2017

Welcome and Meet the SSR2 Review Team Members

SSR2 Review Team Members

16

Review Team Members are representatives nominated from ICANN's Supporting Organizations and Advisory Committees along with a Board appointed liasion

Meet the SSR2 Review Team

	Name	Gender	SO/AC Nomination	Region
1	Jabhera Matogoro	M	ALAC	AF
2	Alain Aina	M	ccNSO	AF
3	Mohamad Amin Hasbini	M	GAC	AP
4	Noorul Ameen	M	GAC	AP
5	Geoff Huston	M	SSAC	AP
6	Ramkrishna Pariyar	M	ALAC	AP
7	James Gannon	M	GNSO	EUR
8	Boban Krsic	M	ccNSO	EUR
9	Emily Taylor	F	GNSO	EUR
10	Žarko Kecić	M	ccNSO	EUR
11	Kerry-Ann Barrett	F	GAC	LAC
12	Cathy Handley	F	RSSAC	NA
13	Denise Michel	F	GNSO	NA
14	Don M. Blumenthal	M	SSAC	NA
15	Eric Osterweil	M	RSSAC	NA
16	Kaveh Ranjbar	M	Board Liaison	

What is the SSR2 Review?

Bylaws Section 4.6. SPECIFIC REVIEWS

(c)(ii) The issues that the review team for the SSR Review (“SSR Review Team”) may assess are the following:

- (A) security, operational stability and resiliency matters, both physical and network, relating to the coordination of the Internet’s system of unique identifiers;
- (B) conformance with appropriate security contingency planning framework for the Internet’s system of unique identifiers; and
- (C) maintaining clear and globally interoperable security processes for those portions of the Internet’s system of unique identifiers that ICANN coordinates.

(iii) The SSR Review Team shall also assess how ICANN has successfully implemented its security efforts, the effectiveness of the security efforts, the extent to which the security efforts are sufficiently robust and threats to the security, stability and resiliency of the DNS, consistent with ICANN’s Mission.

(iv) The SSR Review Team shall also assess the extent to which prior SSR Review recommendations have been implemented

The focus of the SSR2 Review

SSR Review, per Section 4.6 ICANN Bylaws

ICANN's commitment to enhance:

- the operational stability,
- reliability,
- resiliency,
- security,
- global interoperability

... of the systems/processes (internal/ external) that affect the Internet's unique identifiers
