The mission of the Internet Corporation for Assigned Names and Numbers (ICANN) is to ensure the stable and secure operation of the Internet's unique identifier systems. Part of living up to this <u>Mission</u> is a commitment to improve diversity of participation at ICANN, in line with the <u>core values in the new Bylaws</u>. The collection of reliable and relevant data is key to these efforts.

There have been many diversity discussions over the years, culminating in a request from our community at ICANN54, in the 'Women in ICANN, Internet, and ICTs' session, for further statistics to explore gender diversity. Following on community calls for data to inform diversity discussions, as well as to support the community's broader work on diversity, this survey aims to determine current perceptions of gender diversity at ICANN and to identify potential barriers to participation.

A community-wide survey ensures everyone has an opportunity to provide their views and identify areas that require additional attention. By taking just ten minutes to complete this survey, you will help to support diverse and meaningful engagement.

The survey aims to capture data that can help inform community discussions on the topic of gender diversity. Potential solutions or recommendations on next steps could be considered by the community through relevant mechanisms and channels. This survey focuses specifically on gender as one aspect of diversity that relates to potential barriers to participation. Other relevant areas are currently being discussed in the Work Stream 2 Diversity subgroup and may be explored with future surveys.

Your responses are anonymous and will remain confidential. Your participation in this study is entirely voluntary and you may withdraw at any time. Survey responses will be collected and analyzed in accordance with ICANN's Privacy Policy.

Should you have any questions, please email: gendersurvey@icann.org.

low do you ide	entify your gender?
	Male
	Female
	In some other way
	Prefer not to say

PERCEPTIONS OF GENDER, DIVERSITY AND EQUALITY IN THE ICANN COMMUNITY

- 1. Please tick whether you agree, disagree, or are neutral about the following statements: [Options: strongly agree, agree, neutral, disagree, strongly disagree, unsure, not applicable]
 - All genders are treated fairly and equally in the ICANN community.
 - Female and male volunteers have the same opportunities to advance in the ICANN community.
 - ICANN's community culture is male-dominated.
 - The ICANN community should do more to increase gender diversity within the ICANN ecosystem.
 - I support voluntary targets to increase gender diversity amongst volunteers who participate in the ICANN community.
 - I support mandatory quotas to increase gender diversity amongst volunteers who participate in the ICANN community.

• I have felt disadvantaged at ICANN for reasons relating to my gender.

PERCEPTIONS OF GENDER AND COMMUNITY LEADERSHIP IN THE ICANN COMMUNITY

- 2. Please tick whether you agree, disagree, or are neutral about the following statements: [Options: strongly agree, agree, neutral, disagree, strongly disagree, unsure, not applicable]
 - ICANN should do more to increase gender diversity amongst community volunteer leadership.
 - I feel represented by ICANN's current community volunteer leadership.
 - I aspire to reach a position of volunteer community leadership within ICANN. (If you already hold a leadership role, please select "not applicable.")
 - My gender may pose a barrier to my advancement to a position of community volunteer leadership. (If you already hold a leadership role, please select "not applicable.")
 - Preconceptions about female leadership have a negative effect on women's opportunities to advance as community volunteer leaders.

PER

			ceptions about male leadership have a negative effect on men's opportunities to eas community volunteer leaders.
