Cheryl Langdon-Orr (CLO):the call me says it is but it is not doing so... sorry

Terri Agnew:@Cheryl, let me try again

Emily Barabas:slides are currently not synced

Emily Barabas:everyone can control slides for themselves

avri doria:so us saying it goes away means we accept that which currently exists.

Cheryl Langdon-Orr (CLO):indeed A

Cheryl Langdon-Orr (CLO):Alan

avri doria:there were applications

Rubens Kuhl:The number was so small that any information can be traced to individual applicants.

avri doria:an handful, i forgot the actual number

Trang Nguyen:Yes, the eval report provides pass/fail by category

avri doria:the APS starting early might make a difference. a lot of difference.

avri doria:i mean ASP

Alan Greenberg:Results of last Applicant Support Program:

Cheryl Langdon-Orr (CLO):agree Greg

Rubens Kuhl:A possible program should not restrict itself to application fee, but also include planning and ongoing operations.

Cheryl Langdon-Orr (CLO):too little too late

Cheryl Langdon-Orr (CLO):full review needed on this

Rubens Kuhl>Note that .IDN would have failed restricted strings criteria, being a 3-letter country code.

Jim Prendergast:would it help to remind the larger WG that this issue is being discussed and we could use some help?

Christa Taylor:Will do Jim!

Rubens Kuhl:ASP gamed itself out.

avri doria:Personal view: in the 2012 round the anti-gaming factions were the gamers who won.

Cheryl Langdon-Orr (CLO):lots fell down on As effort

Rubens Kuhl:On communications, Stakeholder Engagement capacity at ICANN grew a lot since 2012. So the same programs with the 2012 rules could have a different outcome this time.

Cheryl Langdon-Orr (CLO):Applicant Support

avri doria:Rubens, good point.

Donna Austin, Neustar:I think the AGB was good. I don't know of any other mechanism that would be any great improvement.

Kurt Pritz:On Applicant Support: I know this is late but you could stick it in the notes. I think this group could develop a set of policy principles guiding an applicant support implementation, e.g.,1. Applicant support should be more about coaching and mentoring than financial support2. Financial support could be awarded for the application fee and early registry fees but be focused on making the registry self sufficient3. The support program should be publicized as broadly as the program itself4. The program should take into account that applicants will be unsophisticated and evaluations should be conducted with that understandingWe could knock this out in a couple hours. After we have a simple set of principles, we can turn that over to ICANN to start implementation now for iteration and discussion with the community.

Cheryl Langdon-Orr (CLO):thx Kurt... well worthwhile in my view

Emily Barabas:@kurt - done!

Jim Prendergast:if breach notices were issued, they would be on the compliance page and there are none. Unclear if compliance was involved in this

Jeff Neuman:How do you analyze the financial/business case without knowing the costs of the RSP?

Rubens Kuhl:ICANN staff mentioned that one of the reasons for not triggering EBERO was lack of registrants to be protected. If a TLD only has nic.TLD, it's really not that useful to do a transition.

Phil Buckingham: Great points , Donna - it is a question of the cart before the horse for instance -. We wouldnt need the EBERO if the SLAs were raised. .

Rubens Kuhl:Alan, there is currently an ongoing consensus call in WT4 proposing technical evaluation to be as aggregated as feasible. So even if that doesn't cover previous rounds like the 2012 one, it at least would already cover the next procedure.

Jim Prendergast:the 27 times figure is one data point. Some others were presented by ICANN Technical staff at the DNS Symposium. Ive only seen the presentation (and not heard audio) but the stats on page 23 are broader than the 27 times figure.

Alan Greenberg:@Rubens, understood..

Jeff Neuman:For the record, I think we have established a need for the program. we just need to take Donna's comments into account when moving forward

Jim Prendergast: I disagree with that Jeff

Donna Austin, Neustar:@Jeff, I'm not sure we have.

Jeff Neuman:Both in the Discussion Group, the Charter and previous discussions.....

Karen Day:program or not we must remove barrier of having to choiseRSP before contention is resolved.

Karen Day:\*chosose\*

Karen Day:apologies for typos

Jeff Neuman:Whether it is a "program" or just a pre-approval process, we have had a large number of calls on the benefits of this type of program/process/ or whatever we call it

Cheryl Langdon-Orr (CLO):hold off for more information

Donna Austin, Neustar:@Jeff, perhaps its the terminology that you are using that we're sensitive to. I think we agreed there would be benefit in enable new entrants undergo an approval process prior to the next application window.

Rubens Kuhl:Trang, I believe we should allow before or during, but not after.

Rubens Kuhl:This was the topic of some CC2 comments that we need to take into account.

Cheryl Langdon-Orr (CLO):yup

Rubens Kuhl:While this PDP WG charter does include some topics applicable to current gTLDs, I believe this issue is not in our charter, at least for now.

Terri Agnew:New gTLD Subsequent Procedures Sub Team – Track 1 - Overall Process/Support/Outreach Issue will take place on Tuesday, 13 June 2017 at 03:00 UTC for 60 minutes.

Cheryl Langdon-Orr (CLO):thanks everyone... bye for now then

avri doria:bye

Christopher Niemi:Thanks

Rubens Kuhl:Bye @ll

Trang Nguyen:Thanks, all! Bye!

Katrin Ohlmer, DOTZON:thanks - and bye, everybody!
