RDS PDP WG Poll - 28 June

During our 28 June face-to-face meeting at ICANN59, the RDS PDP WG expanded its focus beyond the minimum public data set by starting deliberation on the Data Elements Charter question: What gTLD registration data elements should be collected, stored, and disclosed?

<u>Based on show of hands during that meeting</u>, we decided to start by **concentrating on the set of data elements to be included in the RDS**. To do so, we agreed to review <u>the entire table of data elements</u> proposed in the EWG Final Report to decide as a WG **what to add and delete** from data elements to be included in the RDS.

This poll gives all WG members an opportunity to:

- (a) indicate how strongly you agree or disagree with including each listed data element in the RDS (questions 2-39),
- (b) propose additional data elements not already listed that you believe should be included in the RDS (question 40), and
- (c) provide rationale for why you believe each data element should or should not be included in the set of data elements to be included in the RDS.

While it is not necessary to give rationale for every data element, sharing your rationale is especially helpful where you strongly agree or disagree.

Poll results will be used to inform deliberation during the 18 July WG meeting and on-list. Specifically, results will be used to deliberate on deletion of data elements that are largely unwanted, and to articulate rationale for inclusion of data elements that are broadly supported. The resulting set of data elements to be included in the RDS (illustrated in the figure below) will then be used to deliberate on collection and access conditions to be applied to each data element.

To allow sufficient prep time, all WG members are asked to apply time set aside for the cancelled 11 July WG call to *review relevant materials* and then participate in this poll. Specifically, **before completing this poll**, WG members are asked to review the following expanded handout, excerpted from the <u>EWG Final Report</u> and the <u>2013 RAA Whois Requirements</u>:

README FIRST: 28JunePoll-DataElements-ExpandedHandout.pdf

In addition, any WG member who did not attend the 28 June WG meeting is also expected to review (at minimum) the second half transcript and/or AC or audio recording to catch up on WG discussion. Meeting notes and materials, including transcripts and recordings, can be found here: https://community.icann.org/x/lATfAw

1. Your name (must be RDS PDP WG Member - not WG Observer - to participate in polls)	
If you are a WG Observer and wish to participate in polls, you must upgrade to WG Member to do so.	
2. Registrant Name	
Registrant Name is defined by the 2013 RAA Whois Requirements (Section 1.4.2) and included in data elements recommended by	ov th
<u>EWG Final Report</u> (page 50). Do you agree this data element should be included in RDS data elements?	, y (i i
Strongly Agree Agree Neutral/Unsure Disagree Strongly Disagree
