¹ The RCRC has provided a minority position statement regarding recommendations that did not achieve a level of consensus at the end of this recommendations section.

² This recommendation depends on identifiers being reserved. If no support is determined for reservation protection, this recommendation is not required.

8	Red Cross Red Crescent Movement Scope 2 identifiers, if added to the TMCH, allowed to participate in 90 Day Claims Notification phase of each new gTLD launch for Second-Level registrations	Consensus NCSG supports, but with some opposition within the SG	

^{**} Because of support to reserve Scope 1 names at the top and second levels, it is not necessary to list Scope 1 names for any of the TMCH recommendations for second level protections.

*** Scope 2 Identifiers contain both full name and acronyms. The distinction is that Scope 1 identifiers are based on a list provided by GAC advice, while Scope 2 names were additionally requested by the RCRC.

⁴ If IGO-INGO identifiers are to utilize the Claims service, both WG deliberation and public comments noted that a separate claims notice, as distinct from the Trademark notices, may be required.

3.2 Unsupported Proposals

The following protection proposals did not achieve a sufficient level of support among the WG (i.e., did not receive at least 'strong support with significant opposition'). A rationale is provided for each.

On the next few pages, the proposals listed per organization seeking protection were originally used during the consensus call and did not receive adequate support to submit as a recommendation. Essentially, any of the proposals that refer to acronym protection are addressed within the first and second General Recommendations (#1 & #2) in Section 3.5. They are placed here as an aid to consider all the protections considered for each organization. The IOC is not listed because their set of recommendations received consensus levels of support.

⁵ This specific recommendation was not a part of the formal consensus call because consensus was gauged from a general recommendation on acronyms and scope 2 identifiers.
