Michael Flemming: Hi Julie

Michael Flemming: Thanks for the call out

Michael Flemming: I am awake now

Julie Bisland: wonderful, good morning :)

Michael Flemming: good morning, indeed

Cheryl Langdon-Orr (CLO): hi all... morning Michael

Michael Flemming: morning Cheryl

Paul McGrady: Hey fellow nerds!

Michael Flemming: Evening Paul!

Phil Buckingham: Evening fellow nerds

Paul McGrady: Ugh!

Phil Buckingham: sorry Paul .

Emily Barabas: this document will require you to zoom

Emily Barabas: as you can see

Phil Buckingham: 2.2.3. regarding these SUDNs which brands which would be affected ? do we have some examples

Julie Bisland: Do we know who's number ends in -9458?

Steve Chan: In some of the research that staff did, it could be the case that ICANN would be in the position of utilizing its own challenge mechanisms

Julie Bisland: Reminder: please mute --some background noise and interference.

Cheryl Langdon-Orr (CLO): I am on the keep the reservation list

Cheryl Langdon-Orr (CLO): case by case

Phil Buckingham: @ Steve, are there other regional organisations that are currently NOT on the list ?

Steve Chan: It had been suggested that the PTI names could also be included?

Cheryl Langdon-Orr (CLO): agree with special use name reservations

Steve Chan: For the PTI names, that could include: PTI, publictechnicalidentifiers and publictechnicalidentifier

Steve Chan: Correct

Cheryl Langdon-Orr (CLO): yep

Paul McGrady: Thanks! Would like to understand the process.

Phil Buckingham: Action item : Could staff get the list of SUDNs on RFC 6761

Paul McGrady: Thanks Cheryl!

Cheryl Langdon-Orr (CLO): peer review

Cheryl Langdon-Orr (CLO): Avri will have best answers

Paul McGrady: Thanks Avri.

Paul McGrady: I guess the takeaway is that there is more than one mechanism to get a new gTLD delegated.

Steve Chan:Google doc for the document being presented is here:

Phil Buckingham:Thanks Avri . Could we therefore recommend that all SUDNs be @ the second level ?
avri doria:yes, but withint the IETF it must be a for a non global DNS purpose. i.e there must be a technical or local reason. i can prepare a more detaild explanation of the process for a later meeting if people want as I do particpate in the IETF process.

avri doria:Phil I have already personally mde that recommendation, but it just a personal suggestion, as the IETF has a role in the namespace ICANN can't make rules, and the current MOU does not stipulate that. and if there were a technical reason why a TLD was needed then they could still reserve one.

Cheryl Langdon-Orr (CLO):ðŹŹŹ

Greg Shatan:Agree with Paul on the issue and the overlap.

Julie Bisland:The next New gTLD Subsequent Procedures Sub Team – Track 2 – Legal/Regulatory Issues will take place on Thursday, 24 August 2017 at 21:00 UTC for 60 minutes.

Steve Chan:@Michael, we have a pair of liaisons between theis WG and RPMs. I believe they are Susan Payne and Robin Gross, if memory serves.

Cheryl Langdon-Orr (CLO):bye ðŹŹŹ for now then

avri doria:bye

Phil Buckingham:Yes we are going to rotate calls in Sept weekly between 15.00 and 21.00 UTC every Thursday

Julie Bisland:Thanks Phil!!
