Alex Deacon:sounds like we need an EPP for p/p providers -> Registrar communications.
Vicky Sheckler:agree w/ metalitz
Theo Geurts:Sounds like a good idea Alex
Theo Geurts:But needs some exploring I guess? It mght shutout non affiliated providers
Alex Deacon:It shouldn't - assuming standard authN/authZ mechanisms and some kind of credential mechanism.
Theo Geurts:Agreed, but how should a lawyer deal with all this when they want to offer some privacy to their clients? Build a full EPP and Escrow Service?
Darcy Southwell:This seems in line with the PDP recommendations and what registrars do today.
Vicky Sheckler:if its line w/ what registrars do today, seems ok to keep
steve metalitz:support having officer info available
Theo Geurts:Agreed with Steve
Darcy Southwell:+1 Steve
Darcy Southwell:It aligns with the PDP.
steve metalitz:Agree the provision not strictly necessary here.
Darcy Southwell:Agree with Theo.
Eric Rokobauer:agree with Theo
Roger Carney:Agree with Theo
Sara Bockey:Agree with Theo
Volker Greimann:Theo+1
Volker Greimann:Theo+1
Volker Greimann:Remove all references to the registration of the domain
Darcy Southwell:Agree with Steve. The P/P provider is limited to suspending the services it provides to its customer.
Lisa Villeneuve:if I am understanding this proposal, customers will be allowed approximately 30 days before a domain name will be suspended. 15 for p/p and 15 for registrar.
steve metalitz:@Lisa that would be unfortunate and we should try to avoid a second bite at the apple. Especially for affiliated providers that seems unfair.
Sara Bockey:I have another question. Active hand

Amy Bivins:Ok, sorry just a sec!
Susan Kawaguchi:I agree that we should not add time to this process
Vicky Sheckler:sounds like we need to clarify more consisely that upon uncorrected false whois, we need an explicit obligation to cancel p/p service.
Griffin Barnett:Agree with Susan and Steve re timing
Vicky Sheckler:agree we need a floor and that p/p providers can chose to have quicker turn around times
steve metalitz:+1 Vicky. The RAA Spec language ends with "Registrar either terminate or suspend or place on Client Hold or and client Transfer Prohibited." The PPAA should contain a more specific obligation, not "be a basis for suspension or cancellation."
Theo Geurts:Good suggestion Steve
steve metalitz:Whois Accuracy Spec #5 to RAA.
steve metalitz:+1 Roger but still useful to have this language to ensure customer is on notice.
Griffin Barnett:Agree Darcy, a P/P provider itself cannot cancel anything, it would need to be the registrar....domain name would be locked during a UDRP by the registrar
Griffin Barnett:Perhaps all this means is that the P/P provider should provide notice to the customer of this cancellation lock issue?
Griffin Barnett:But again, that should already be included in the registration agreement
Griffin Barnett:Good point Steve, P/P provider could provide option of cancelling the registration instead of disclosing customer identity pursuant to UDRP complaint...could this work in practice, given cancellation lock provisions of UDRP rules?
Theo Geurts:That was ny point Griffin, thanks :)
Darcy Southwell:Prohibition of cancelation of a domain name during a UDRP is a registrar obligation I see no reason to include this language in the P/P accreditation agreement.
Roger Carney:I tend to agree with Darcy here
Theo Geurts:yes
Theo Geurts:oops
Mary Wong:@Griffin, I think Steve was talking about the Disclosure Framework process, where the Provider can refuse to Disclose a Customer's details in response to a Disclosure Request in the case where "the Customer has surrendered its domain name registration in lieu of disclosure, if the Provider offers its Customers this option"
Griffin Barnett:Thanks Mary, I certainly support that concept...i thought we were talking about in the context of a UDRP complaint being brought....slgihtly different scenario

Roger Carney:Thanks Everyone!
Griffin Barnett:bye all, thanks
Eric Rokobauer:thanks!
