Onboarding Program Testimonial: Tracy Hackshaw

Participating in the Pilot Community Onboarding Program was a career defining experience for me. Being a part of securing the future of DNS multistakeholder model in collaboration with my fellow Mentors in the Program, and especially my "Mentee", Rapid Sun, a senior Government official and IDN expert from Cambodia, was a richly rewarding experience. Rapid's work in the Program was truly impactful, and it was a pleasure to feed off his enthusiasm and passion, which he took right back to the Internet Community in Cambodia by organizing several DNS-specific events.

I am confident that the Program's impact will be significantly felt both within the ICANN DNS Community as well as the wider Internet Governance multistakeholder ecosystem.
