David Olive: Good morning and welcome everyone. If it's Thursday it must be Los Angeles. And so let me welcome everyone to the Noncontracted Party House session. We need the code again sorry. We apologize for some of the technical issues that we've encountered to get everyone connected but we're happy to get everyone started today.

I just wanted to again say a word of welcome to all of you. You've come from many parts of the globe to attend this important session at an important time for us. As you know we are discussing GDPR, various models for ICANN and others. There are public comments going on. There will be a Webinar tomorrow which we hope to host people here if they wanted to attend to see that. And of course you'll have an opportunity to talk to members of the board, other members, senior members of the ICANN org team as well as the CEO, Goran Marby.

So with that that's great. I'm happy to have you all here and now working. I'd like to point out the policy team supporting us today and tomorrow -- Mary Wong, (Ozan) and (Benedetta). So I thank you and they're there to assist as you go forward in an important strategic planning and coordination session

today. I will end here unless you have any questions for me. I will be in and out of the meetings that you have today because in addition to the sessions we've had with the GNSO Council we also have the Board of Directors Workshop and so I'm going back and forth but I'm happy to spend most of the time sometime today and most of tomorrow with you and listening to your conversations. If there are any questions now I'm happy to take them. If not I'll be available and in the back and around the margins of your meeting to do so. With that I think you're ready to start your agenda and thank you very much.

Mary Wong: Hi everybody. This is Mary from staff. So again apologies. We're a little behind. Things should be up and running if they're not already very, very soon. So we're about to move into the first session which is the breakout session. And I'm told that the - we have the next room available which is set up in the same way with Adobe Connect and open lines for your constituencies and stakeholder groups. So we're going to ask that the NCSG members - thanks (Brian). If you...

(Brian):   (Unintelligible).

Mary Wong: I love the echo reverb. So the next room is reserved for NCSG. And at that appointed time after you're done we can come back and then we can do the sharing exercise for both SGs and all the constituency groups. And you always have your staff support here as well as remotely. We have (Andrea) for the CSG and Maryam for the NCSG. And they will be on the Adobe Connect as well. So let us know if you have any questions, if you have any needs. But if not we'll have CSG in this room and NCSG right next door. Thank you. Stephanie?

Stephanie Perrin: Do you mind reading out lout the precise WiFi code? I'm getting not direct code or too many...

Man: It's maxed out.

Stephanie Perrin: It's maxed out. Yes.

Man: I'm (unintelligible).

((Crosstalk))

Man: The WiFi password is IUV2ZDQM.

Man: I think we're running into the user limit.

((Crosstalk))

END
