# Running .JP for the interest of the community

- “Advisory Committee” on JP domain name service policy
  - members are the representatives from the following 7 sectors
    - JPNIC
    - JP domain name registrars
    - ISPs
    - Private sector (user companies)
    - academic experts
    - individual Internet users (e.g., consumers)
    - Japanese Government (from 2015)
  - JPRS submits a consultation document when it is necessary or Advisory Committee spontaneously finds something necessary to discuss.
- Check on stability as an registry
  - JPRS reports its service performance and financial status to JPNIC at least once a year. And then, JPNIC checks it and reports it further to the Government.
  - JPRS reports its financial status to the public.

# Why IGCJ?

- Internet Issues are getting more...
  - complicated, globalized, seriously impacting, stakeholders involved, politicized, ...
- Low interest/concern about Internet Governance in Japan
  - Less awareness regarding importance of IG discussion
  - There hadn't been any suitable activities in Japan to address this situation (as of 2 years ago)
- IGCJ aims to be a (bottom-up) platform
  - for various stakeholders
  - to discuss various Internet-related issues
  - no decision making mechanism in IGCJ
- IGCJ keeps its activities continuous
  - Physical meetings with remote participation every other months
  - Provide information through Mailing list, facebook page, etc
- IGCJ liaises with other existing/theme-specific activities

# What IGCJ has discussed

- IANA Stewardship Transition
- Net Neutrality
- Cloud and Copyright
- Data privacy
- Japanese Root LGR
- Security
- Fake News
- ITU-D
- I\* Organizations
