

Work plan: what are next steps?

1. Topics to be addressed according to charter of the WG

1.3 High Level overview of topics and Issues pertaining to Retirement

Based on an initial analysis of the cases of retirement to date the following initial topics and issues emerge that, among others, may need to be addressed:

- Consistency of terminology
- What triggers a retirement?
- Who triggers retirement process?
- Additional conditions for retirement of a ccTLD?
What are conditions for actual retirement of a ccTLD? Is the occurrence of a triggering event sufficient or should additional requirements be in place?
- Compliance with conditions?
Assuming retirement of a ccTLD is conditional, who will monitor, and who will be held accountable, if at all, if requirements are not met?

2. What has been done to date?

- Presentation ISO 3166
- Presentation PTI perspective
- Discussions email list
 - Scenario's
 - Role of the MA/terminology and different categories two-letter codes
 - .SU case
 - .UM case

3. Proposed Next steps

- Terminology/ Glossary
 - See summary of cases
 - Living document: see Terminology – Glossary document
- Approaches for analysis and developing recommended policy.
 - What are the initial questions the WG wishes to address? What should be included and what excluded from analyses and policy development? What does the group consider retirement?
See document: Approaches and overall working method version 1.
 - See captioning scenario discussion (same as previous document)
