

2012 New gTLD Program Round – Sunrise Launch Metrics

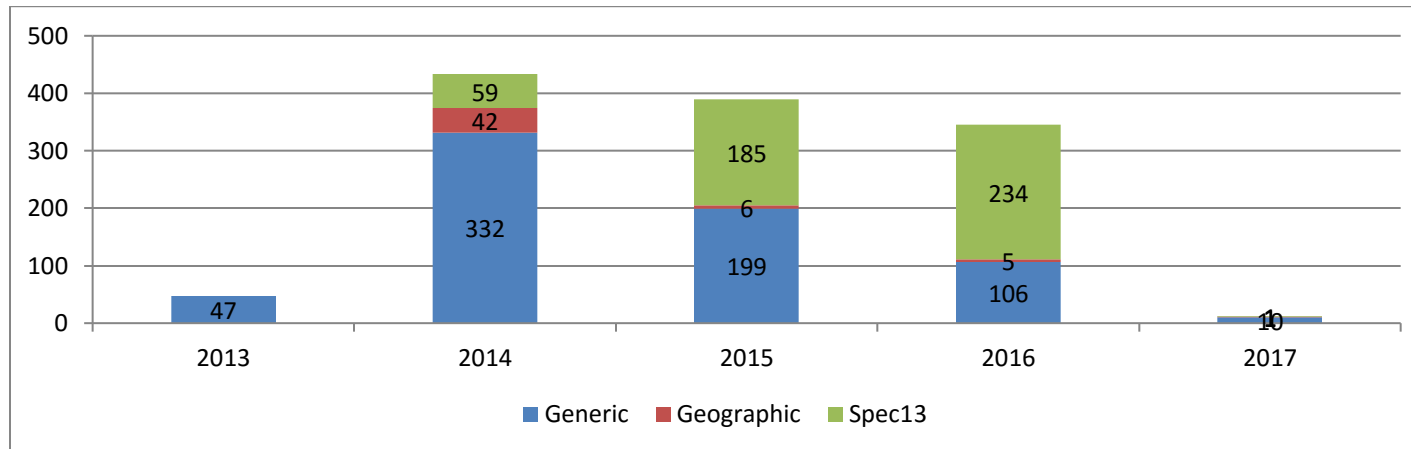

I. GTLD DELEGATION NUMBERS

The first two charts show the number of gTLDs delegated by year in the 2012 New gTLD Program round; they provide context for the Sunrise data contained elsewhere in this draft report.

CHART 1: gTLDs Delegated by Year by Type (as of Aug 2017):

** Based on delegation date as noted on the ICANN 2012 New gTLD Program microsite: <https://newgtlds.icann.org/en/program-status/delegated-strings>

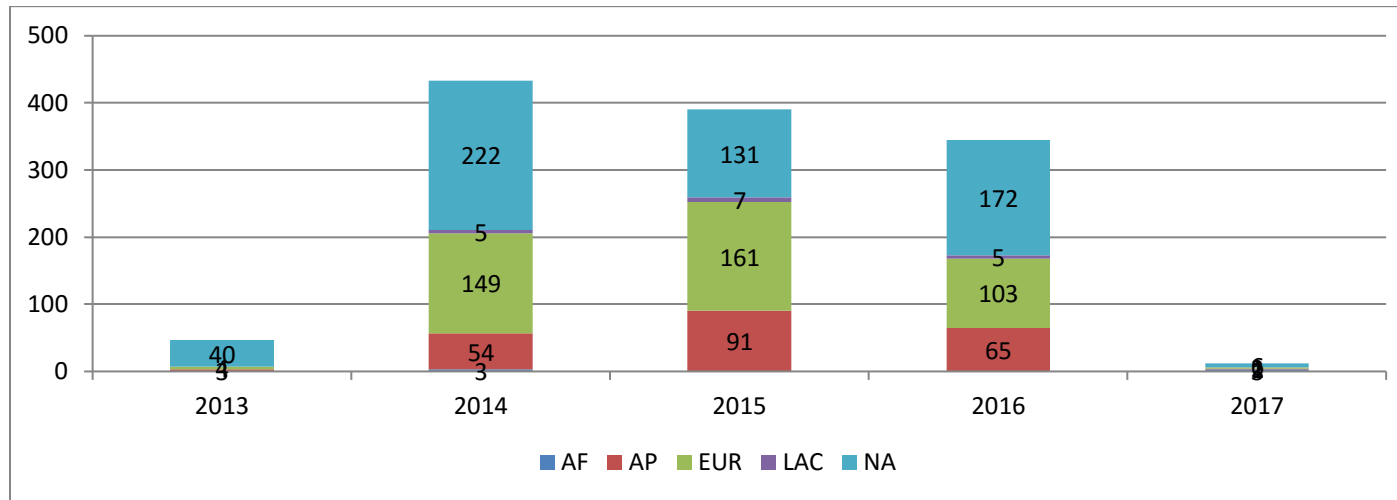

2012 New gTLD Program gTLDs are all considered “generic” from the perspective of IANA (see: <https://www.iana.org/domains/root/db>). However, the Applicant Guidebook and subsequent implementation of the round further distinguished generic TLDs from Geographic TLDs that required approval from the respective authority and Brands that qualified for Specification 13. Thus, of the 1227 gTLDs from the 2012 round delegated to date, 694 are considered generic for the purposes of this report, and are not assigned a designation of either a geographic or Specification 13 gTLD.

	Generic	Geographic	Spec13	Grand Total
2013	47			47
2014	332	42	59	433
2015	199	6	185	390
2016	106	5	234	345
2017	10	1	1	12
Grand Total	694	54	479	1227

CHART 2: gTLDs Delegated by Year by Region (as of Aug 2017):

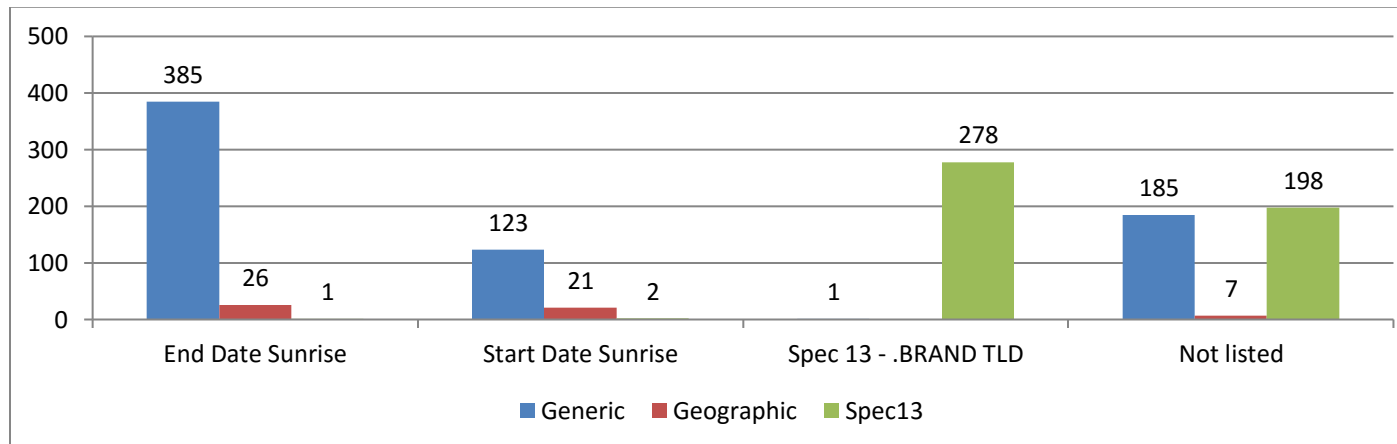

** Based on delegation date as noted on the gTLD microsite: <https://newgtlds.icann.org/en/program-status/delegated-strings>

II. SUNRISE LAUNCH DATA

Sunrise services provide trademark holders with an advance opportunity to register domain names corresponding to their marks before names are generally available to the public. New gTLD registries are required to offer a Sunrise period of at least 30 days.

CHART 3: gTLDs by Type and by Sunrise Type (as of Aug 2017):

	Generic	Geographic	Spec13	Grand Total
End Date Sunrise	385	26	1	412
Start Date Sunrise	123	21	2	146
Spec 13 - .BRAND TLD	1		278	279
Not listed	185	7	198	390
Grand Total	694	54	479	1227

NOTES & DEFINITIONS:

End-Date Sunrise¹ - the Registry Operator must provide the service for a minimum of sixty (60) calendar days prior to General Registration, and must not use a time-based allocation process (e.g., first come, first served).

- one gTLD, .CAPETOWN, was granted Specification 13 status but still listed an End Date Sunrise; this could be in error, or perhaps the sunrise data was loaded prior to obtaining Spec 13 approval as to advance the TLD launch.

Start-Date Sunrise² - the Registry Operator must provide the service as a time-based allocation process (e.g., first come, first served) for a minimum of thirty (30) calendar days prior to General Registration and must provide thirty (30) calendar days' notice prior to the start of the Sunrise period.

- two gTLDs, .CITIC and .XN--FIQ64B, were granted Specification 13 status but still listed a Start Date Sunrise; this could be in error, or perhaps the sunrise data was loaded prior to obtaining Spec 13 approval as to advance the TLD launch.

Specification 13 - .BRAND TLD – Registries that were approved via the Specification 13 process are not required to conduct a Sunrise launch. However, they are required to conduct a minimum 90 day Trademark Claims period, which will be examined in a separate TM Claims analysis. Spec13 gTLDs are listed here within the Sunrise analysis only as a reconciliation process across all the gTLDs delegated to date.

- one gTLD, .GODADDY, was granted Specification 13 status, but it was later cancelled by ICANN Org to avoid conflict within the RrSG charter rules.

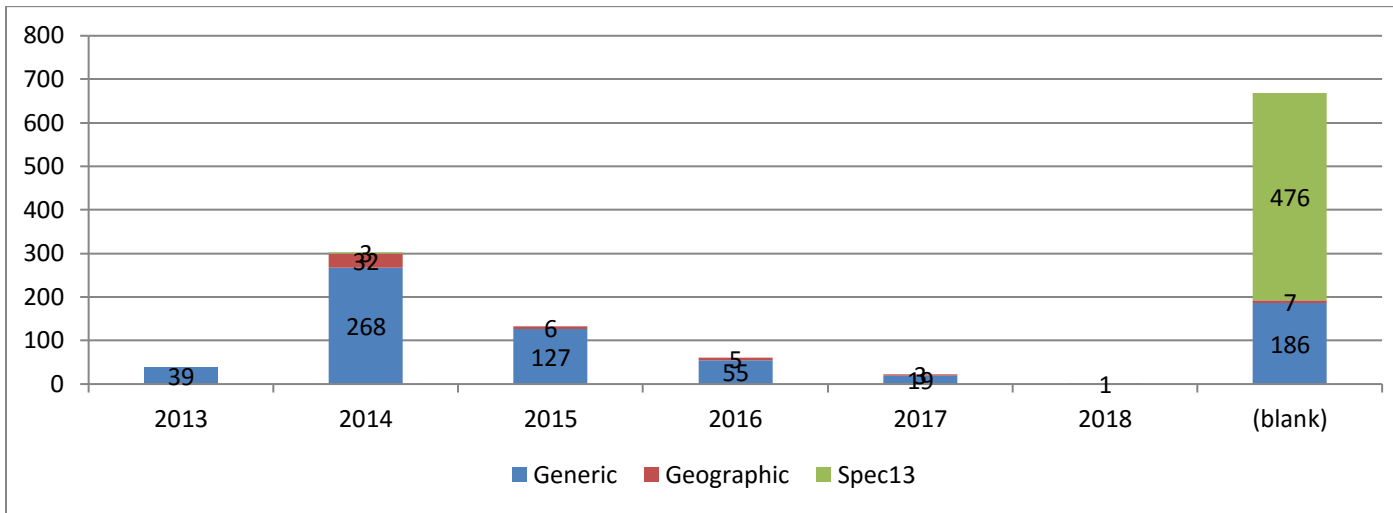

Not Listed – Registries that have yet to provide or that are not required to provide Sunrise launch information.

- 198 gTLDs were granted Specification 13, but have yet to provide any launch data from the gTLD Startup site.

¹ See the ICANN Staff RPM Paper at <https://newgtlds.icann.org/en/reviews/rpm/rpm-review-11sep15-en.pdf> and the TMCH Requirements at <https://newgtlds.icann.org/en/about/trademark-clearinghouse/rpm-requirements-14may14-en.pdf>.

² See the ICANN Staff RPM Paper at <https://newgtlds.icann.org/en/reviews/rpm/rpm-review-11sep15-en.pdf> and the TMCH Requirements at <https://newgtlds.icann.org/en/about/trademark-clearinghouse/rpm-requirements-14may14-en.pdf>.

CHART 4: gTLDs by Type and by Year of Sunrise Launch (as of Aug 2017):

The above chart shows the quantity of Sunrise launches by year as to indicate concentration, with 2014 being the most active. Please note the following:

- The designation of a gTLD in a particular year is based on the first day of its Sunrise period.
- The chart does not distinguish between End Date or Start Date Sunrises.
- The gTLD, .ZUERICH does not intend to launch their Sunrise until 2018.
- The .GODADDY Specification 13 designation was cancelled and its TLD type converted from Spec13 to Generic.

CHART 5: Duration from Delegation to Start of Sunrise Period (as of Aug 2017):

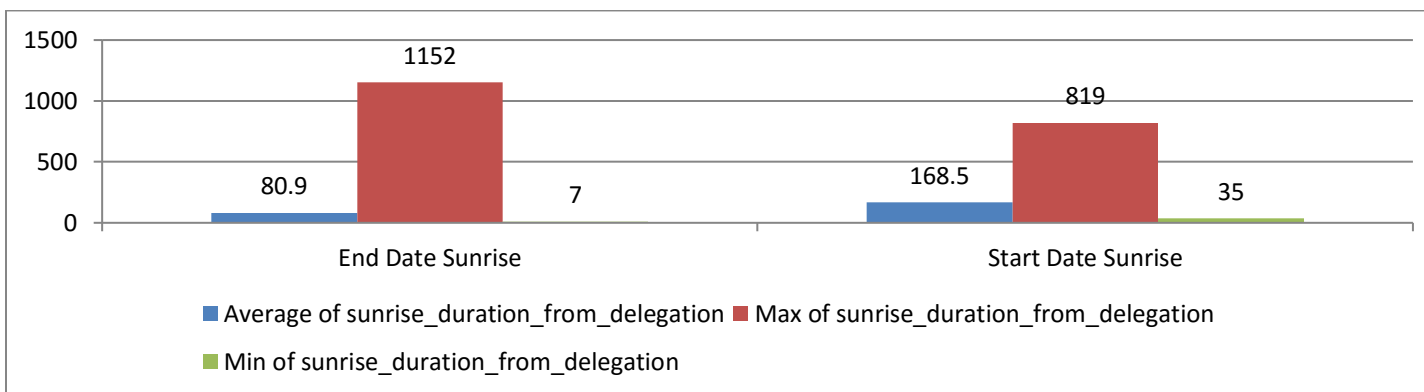

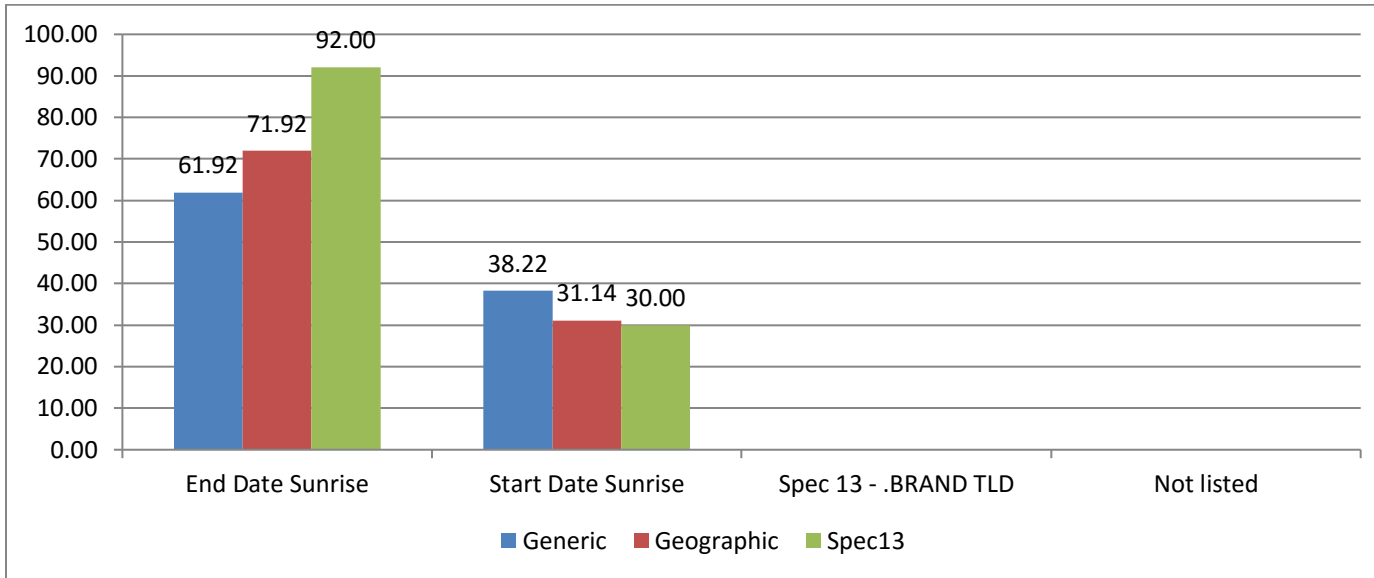

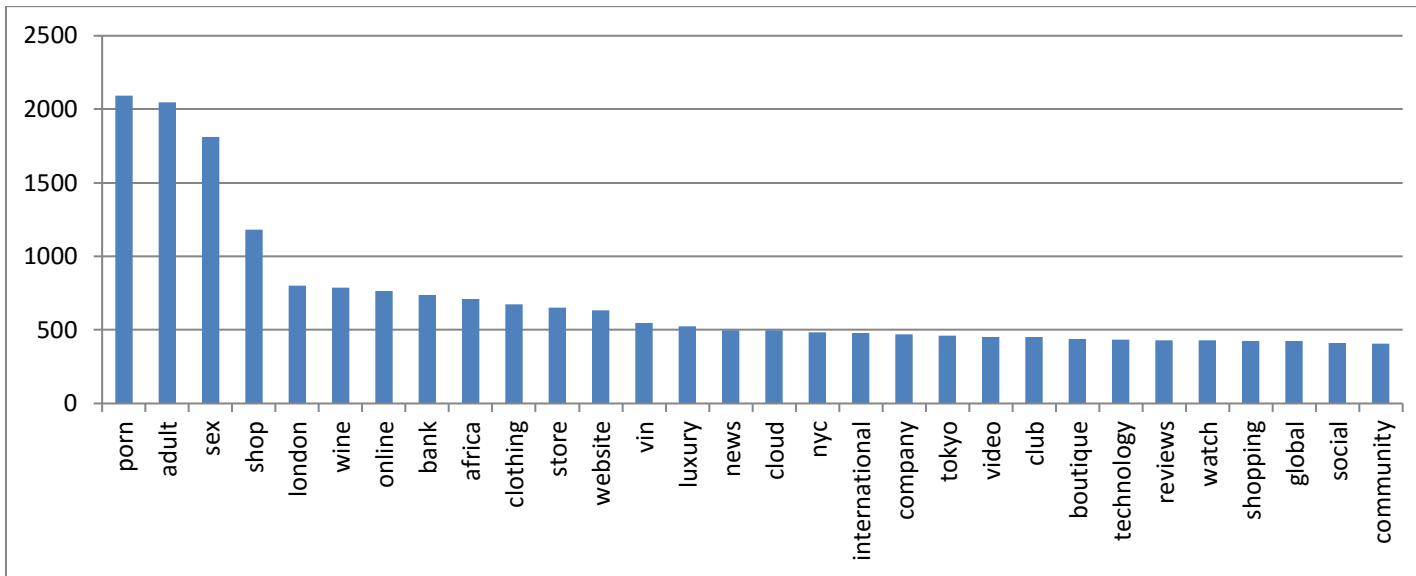

CHART 6: gTLDs by Type and Average Duration of Sunrise Launch (as of Aug 2017):

	Generic	Geographic	Spec13	Grand Total
End Date Sunrise	61.92	71.92	92.00	62.63
Start Date Sunrise	38.22	31.14	30.00	37.08
Spec 13 - .BRAND TLD				
Not listed				
Grand Total	56.21	53.70	50.67	55.96

- Spec13 averages are only based on three gTLDs that had listed Sunrise launch data and are considered outliers; thus they are not useful for comparison with Generic or Geographic gTLDs.
- Based on launch data submitted to ICANN, no TLD that executed a Start Date Sunrise did so less than 30 days.
- Based on launch data submitted to ICANN, no TLD that executed an End Date Sunrise did so less than 60 days with the exception of one that showed duration of 59 days.

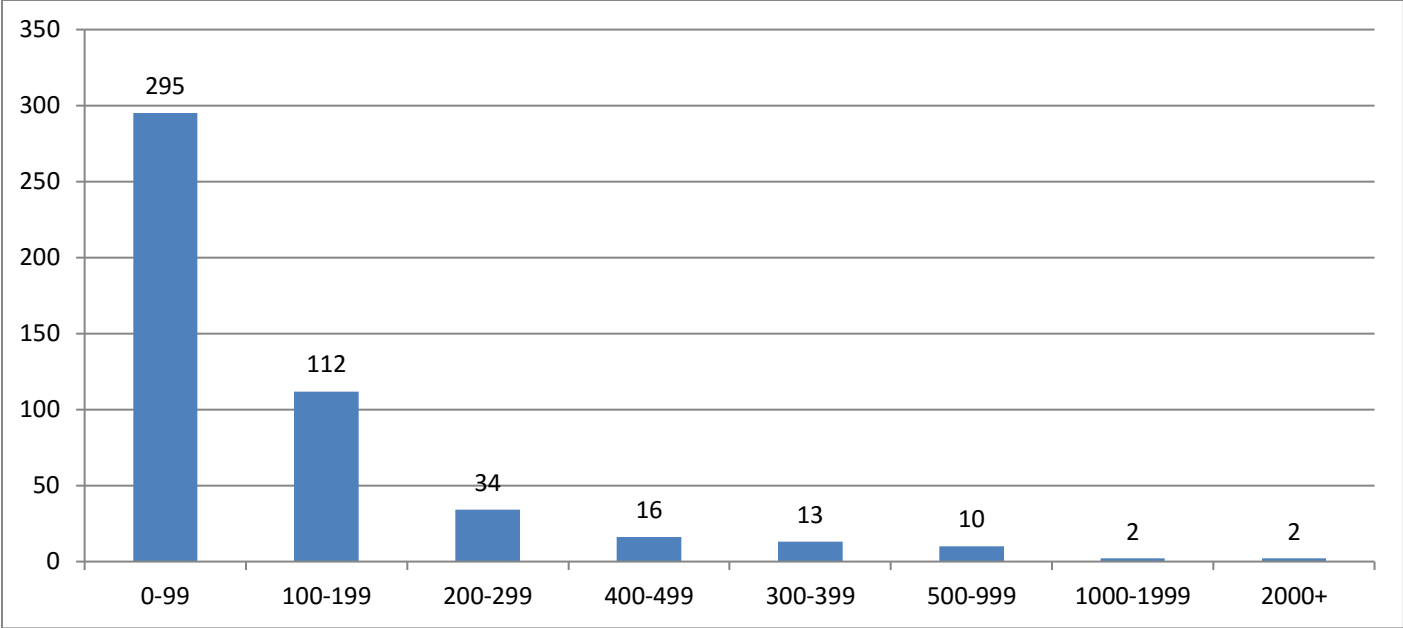

CHART 7: Sunrise Launch Registration Totals in Specific New gTLDs (as of Aug 2017):

The above chart only shows the top 30 gTLDs that registered Second Level Domains (SLDs) during Sunrise, which also equates to the top 30 gTLDs that had 400 or more Sunrise registration. In comparison, as of August 2017: there are a total of 63,852 Sunrise registrations across 484 gTLDs, with an average of 131.9 Sunrise registrations per gTLD at a median of 77.

Total Sunrise Registrations(as of August 2017)	
Source: CCT-RT Metrics (TMCH Monthly Reports)	
Total SLDs	63,852
Total TLDs	484
Avg. / TLD	131.9
Median	77.0
