

**Satish Babu:**

There are several documents (Minutes of Meetings, mostly) available on the ICANN site from the early days of APRALO.

The preparation of the first APRALO MoU appears to have started in late 2007, while it seems to have been signed in 2008 at New Delhi.

The names used for APRALO include "At-Large Asia Pacific" and ALAC-AsiaPac. Here are a few links for those interested (these are neither complete nor sequential, and serve to provide a "flavour" of the way the community worked at that time).
