

## Draft Report

- All to maintain survey recommendations and consider consolidating all recommendations that reference topics related to asking consumers for their sense of trust, etc. in domains (i.e. **recs. 9, 11, 13**)
- **Rec. 5:** Jonathan to provide an updated version of the parking paper based on today's discussion. **DONE**
- **Rec 12. and 24** are separate: Dejan sent updated language for **Rec 12.** Jean-Baptiste to update PowerPoint. **DONE**
- Consolidate **recommendations 13, 15, 33** into a single end-user survey: Lauren to consider whether it will be a part of the earlier larger recommendation on conducting a single end-user survey. Jordyn to consolidate registrant survey recommendations and Lauren to address end-user survey recommendations for possible consolidation.
- **Rec. 14** (assigned to David Taylor): Rewriting it to include removal of barriers to diversity (i.e. more niche TLDs or other business models?) to incentivize it rather than encouraging a particular business model.
- **Rec 16:** Carlos and Lauren to refocus recommendation to focus on data collection needed for the next review team rather than a study. Carlos to move some of the text in **Rec 16** to the analysis section.
- **Rec. 25-30:** ICANN org to reach out to Subsequent Procedures leadership and ask where they are in their highly regulated strings discussion. As it will influence priority level for the recommendation -- does it need to be completed in time for Subsequent Procedures PDP WG to address in its work?
- **Rec 32, and 33:** Stay as is.
- **Rec 35:** remove recommendation, pending Jamie's review. Delete **rec 36**. Some of rationale from **recs 35 and 36** should be included in **rec 14** or elsewhere in the text. i.e. Observations about risks and costs and benefits in the text.
- **Rec. 40:** Jordyn to draft text (by Monday 30 Oct - **OVERDUE**) to capture discussion on registrant survey with INTA Survey.

## Final Report

- **Executive Summary:** Jonathan to include a section on conclusions about the program
- **Final numbering of recommendations:** Restart with clear numbering and digestible way of reporting recommendations. Add a paragraph under the public comment section in the appendix "review process" describing which recommendations were consolidated based on the input received from comments.
- **Recommendation summary:** add a column with level of consensus.
- Finish consolidation exercise, circle back to staff for a cost analysis of the new/consolidated recommendations, CCTRT to determine whether each recommendation is worth/not the cost, and if it's not then delete.
- Review Team to identify any sections in the draft report that need to be updated based on public comments received, and all to compare public comment sheet to apply changes.
- Set up discussion after ICANN60 with ICANN org on standardizing recommendation language so they may be translated into Board resolutions.
- ICANN Org to review and clarify to Jonathan how a subset of the team is maintained to help with recommendations' implementation after conclusion of the review?
