

During our [12 December meeting](#), the RDS PDP WG continued deliberation on **Domain Name Management** as a legitimate purpose for collecting some registration data, working from the [purpose document produced by drafting team 2](#). The WG deliberated on the registration data needed for this purpose, refining the drafting team's list of tasks and data.

This poll gives all WG members an opportunity to express their views about a proposed WG agreement that surfaced during this call, as well as additional data proposed by drafting team 2 to be discussed in next week's call.

Note that we are using a building-block approach to reach points of rough consensus on our charter question of "Purpose:" As such, any agreement on the legitimacy of collecting data for this one purpose does not preclude additional purposes being agreed as legitimate for the same or other data. Poll results will be used to inform deliberation during future WG meetings and on-list.

Any WG member who did not attend the 12 December WG meeting is expected to catch up on WG discussion before taking this poll. Meeting notes and materials, including transcripts and recordings, can be found here: <https://community.icann.org/x/MgByB>

This poll will close at COB Saturday 16 December.

As [previously announced](#), by submitting a response to this poll, you are granting permission for your entire response - including WG member name and response timestamp - to be included in published poll results. Responses submitted by WG members are not assumed to reflect the views of any organization with which they may be affiliated.

*** 1. Your name (must be RDS PDP WG Member - not WG Observer - to participate in polls)**

If you are a WG Observer and wish to participate in polls, you must upgrade to WG Member to do so.

Please do NOT participate in this poll if you are a WG Observer who has not upgraded to WG Member.

2. Registration Data needed for Domain Name Management:

Based on the following agreed definition of Domain Name Management:

Information collected to create a domain name registration, enabling management of the domain name registration, and ensuring that the domain registration records are under the control of the authorized party and that no unauthorized changes or transfers are made in the record.

Those on the 12 December WG call discussed the following statement with a mixture of agreement and disagreement:

The following information is NOT needed for the purpose of Domain Name Management:

Technical Contact, Administrative Contact, Registrar Abuse Contact.

To inform further WG deliberation on data needed for this purpose, we will not limit this week's poll to testing the above proposed WG agreement. Instead, this poll question examines your level of agreement with all data needed (essential) to perform Domain Name Management tasks.

- Please focus your response on data that is essential for this purpose. Additional data which may be useful but not essential will be deliberated separately.
- In this poll, the term "collection" includes not only data collected from registrants, but also data derived or implied or otherwise supplied by the registrar or registry.
- Do not assume that collection implies public or non-public access to that data or who will have access; this will be deliberated separately later.
- Resolving Technical Issues associated with Domain Name Resolution after a Domain Name has been registered falls under a separate purpose not addressed here.

Check every box below where you agree that the associated registration data is needed for the purpose of Domain Name Management. Leaving any box below unchecked means that you do not agree the associated registration data is needed for this purpose. The comment box below should be used to give rationale for why specific data is or is not needed for this purpose, or for any other comments you wish to make about Domain Name Management data needs.
