

During our [20 December meeting](#), the RDS PDP WG completed deliberation on **Domain Name Management** as a legitimate purpose, based on [results from last week's poll](#). The WG then started deliberation on **Domain Name Certification** as a legitimate purpose, working from the [purpose document produced by drafting team 3](#).

This poll gives all WG members an opportunity to consider and express their views about two proposed WG agreements that surfaced during this call.

Note that we are using a building-block approach to reach points of rough consensus on our charter question of "Purpose:" As such, any agreement on the legitimacy of collecting data for this one purpose does not preclude additional purposes being agreed as legitimate for the same or other data. Poll results will be used to inform deliberation during future WG meetings and on-list.

Any WG member who did not attend the 20 December WG meeting is expected to catch up on WG discussion [before taking this poll](#). Meeting notes and materials, including transcripts and recordings, can be found here: <https://community.icann.org/x/NQByB>

This poll will close at COB Saturday 30 December.

As [previously announced](#), by submitting a response to this poll, you are granting permission for your entire response - including WG member name and response timestamp - to be included in published poll results. Responses submitted by WG members are not assumed to reflect the views of any organization with which they may be affiliated.

*** 1. Your name (must be RDS PDP WG Member - not WG Observer - to participate in polls)**

If you are a WG Observer and wish to participate in polls, you must upgrade to WG Member to do so.

Please do NOT participate in this poll if you are a WG Observer who has not upgraded to WG Member.

2. Domain Name Management:

Discussion of data elements required for the purpose of Domain Name Management was based on the definition given in WG Agreement #48 (previously agreed):

Domain Name Management is a legitimate purpose for collecting some registration data, based on the definition: Information collected to create a domain name registration, enabling management of the domain name registration, and ensuring that the domain registration records are under the control of the authorized party and that no unauthorized changes or transfers are made in the records.

During this week's call, the WG reviewed 12 December poll results regarding data required for Domain Name Management. Those on the call expressed support for an additional possible WG agreement, as follows:

The following registration data is needed for the purpose of Domain Name Management: Domain Name, Registrant Name, Registrant Organization, Registrant Email, Registrar Name, Creation Date, Updated Date, Expiration Date, Nameservers, Domain Status, and Administrative Contact.

This new possible WG agreement requires all data receiving 100-82% support in last week's poll. Following discussion of rationale for Administrative Contact (supported by 77% in last week's poll), that data was also included in the new possible WG agreement. While rationale for Registrant Postal Address and Phone were also discussed - particularly with respect to data useful during Domain Name Transfers - these and other data elements with less than 60% in last week's poll were dropped due to insufficient support.

- Please focus your response on data that is essential for this purpose. Additional data which may be useful but not essential will be deliberated separately.
- In this poll, the term "collection" includes not only data collected from registrants, but also data derived or implied or otherwise supplied by the registrar or registry.
- Do not assume that collection implies public or non-public access to that data or who will have access; this will be deliberated separately later.
- Resolving Technical Issues associated with Domain Name Resolution after a Domain Name has been registered falls under a separate purpose not addressed here.

Please indicate below which statement below best reflects your level of agreement.

- a) Agree with the possible WG agreement: The following registration data is needed for the purpose of Domain Name Management: Domain Name, Registrant Name, Registrant Organization, Registrant Email, Registrar Name, Creation Date, Updated Date, Expiration Date, Nameservers, Domain Status, and Administrative Contact.
- b) Agree with the possible WG agreement above but wish to propose additional data essential for this purpose
- c) Disagree with the possible WG agreement above (please explain or propose alternative below)

Please provide your rationale for disagreeing with the possible WG agreement or proposed alternative or additions:

3. Domain Name Certification:

Initial agreement during the call was based on the following draft definition of Domain Name Certification produced by the drafting team:

Information collected by a certificate authority to enable contact between the registrant, or a technical or administrative representative of the registrant, to assist in verifying that the identity of the certificate applicant is the same as the entity that controls the domain name.

Following discussion of this purpose, CABForum-defined methods for Organizational and Extended Certificate validation, and refinement of possible agreement text, those on the 20 December call expressed support for the following possible WG agreement:

Domain Name Certification is NOT a legitimate purpose for requiring collection of registration data, but may be a legitimate purpose for using some data collected for other purposes. (Access requirements to be deliberated at a later stage.)

Please indicate below which statement below best reflects your level of agreement.

- a) Domain Name Certification is NOT a legitimate purpose for requiring collection of registration data, but may be a legitimate purpose for using some data collected for other purposes.
- b) Domain Name Certification is NOT a legitimate purpose for requiring collection of registration data, but I wish to propose an alternative statement in the comment box below.
- c) Domain Name Certification IS a legitimate purpose for requiring collection of some registration data. (Please provide rationale and essential data in the comment box below.)

Please provide your rationale for disagreeing with the possible WG agreement or proposed alternative:

Please click the Submit button below to record your responses.

By submitting a response to this poll, you are granting permission for your entire response - including WG member name and response timestamp - to be included in published poll results.

Input gathered through this poll will be used as input to further WG deliberation on charter questions. Thank you for participating in this poll.
