Work Plan - new gTLD Auction Proceeds Cross Community Working Group - updated 13 November 2017

The draft work plan below outlines a proposed sequence as well as approach with regards to addressing the CCWG charter questions, based on the initial discussions of the CCWG. Note that the outline below is for discussion purposes only and will be updated to reflect the input from the CCWG. The current outline is a best case scenario approach –additional time may need to be built in to address the different charter questions and/or consult with CCWG and/or external experts. The CCWG may want to discuss what date it would like to set as a target for the publication of its Initial Report to determine whether to extend the overall timeline or consider other ways to speed up the work such as an increase in meetings (e.g. change from meeting every two weeks to meeting every week or increasing the duration of the call from 90 to 120 minutes). Note, there is no specific deadline that is expected to be met, either as the result of external events or charter organizations directions, so it is up to the CCWG to determine the pace and duration of its deliberations.

Proposed Approach for Dealing with Charter Questions (dated 18 April 2017)

CHARTER QUESTION APPROACH

Stage 2 - Address any charter questions that have been identified requiring a response before commencing the next phase

2. As part of this framework, what will be the limitations of fund allocation, factoring in that the funds need to be used in line with ICANN's mission while at the same time recognising the diversity of communities that ICANN serves? This should include recommendations on how to assess whether the proposed use is aligned with ICANN's Mission. Furthermore consideration is expected to be given to what safeguards, if any, need to be in place.

#4. What aspects should be considered to define a timeframe, if any, for the funds allocation mechanism to operate as well as the disbursements of funds? E.g. The timeframe for the operation of this new mechanism may provide the opportunity for long term support, or for funding to be released in tranches linked to milestone achievements, single or multiple disbursements.

47. Should ICANN oversee the solicitation and evaluation of proposals, or delegate to or coordinate with another entity, including, for example, a foundation created for this purpose?

Stage 3 - Compile list of possible mechanisms that could be considered by CCWG

Detail main characteristics of each mechanism

Conduct strength/weakness assessment for each mechanism

Review from the perspective of legal, fiduciary and audit constraints

Consultation with identified experts to obtain input / briefing on different mechanisms and confirm whether list compiled is complete and accurate

#1. What framework (structure, process and/or partnership) should be designed and implemented to allow for the disbursement of new gTLD Auction Proceeds, taking into account the legal and fiduciary constraints outlined above as well as the existing memo on legal and fiduciary principles? As many details as possible should be provided, including any implementation guidance the CCWG may have in relation to the establishment of this framework as well as criteria for the selection / ranking of potential funding requests.

Stage 4 - Determine which mechanism(s) demonstrates most potential to meet CCWG expectations as well as conform with legal & fiduciary constraints.

Stage 5 - Answer charter questions (as organized per 1) for mechanism(s) that demonstrated the most potential

#3. What safeguards are to be put in place to ensure that the creation of the framework, as well as its execution and operation, respect the legal and fiduciary constraints that have been outlined in this memo?

#5. What conflict of interest provisions and procedures need to be put in place as part of this framework for fund allocations?

#11. Should a review mechanism be put in place to address possible adjustments to the transework following the completion of the CCWGs work and implementation of the framework should changes coour that affect the original recommendations (for example, changes to legal and flduciary requirements and/ or changes to ICANN's mission)?

48. What aspects should be considered to determine an appropriate level of overhead that supports the principles outlined in this charter?

#9. What is the governance framework that should be followed to guide distribution of the proceeds? The issues addressed by a governance framework could include (but does not have to be limited to):

- a. What are the specific measures of success that should be reported upon?
- b. What are the criteria and mechanisms for measuring success and performance?
- c. What level of evaluation and reporting should be implemented to keep the community informed about how the funds are ultimately used?

10. To what extent (and, if so, how) could ICANN, the Organization or a constituent part thereof, be the beneficiary of some of the auction funds?

Stage 6 - Following concensue on mechanism and responses to charter questions, meeting legal, fiduciary and sudit constraints, publish initial Report for public comment
