

Details and proposed approach for dealing with external experts – updated 10 January 2018

The small group of volunteers reviewed the list of experts identified by the CCWG and has categorized the experts in the following categories. In considering which experts are most suited to address the different scenarios and different questions, the small group of volunteers considered the following factors:

- Does a direct contact exist which normally means direct access and likely response/participation;
- Does a possible conflict of interest exist, e.g. is the external expert identified also likely to apply for auction proceeds;
- Expected knowledge / expertise in relation to the scenario and questions identified as well as experience in / knowledge of dealing with developing countries and countries under sanctions.

The experts identified are ranked in order, as determined by the small group of volunteers. All experts identified will be approached with the request to provide a response to the questions outlined in this document, but only those identified with “to be invited for follow up call” will be invited at this stage to join a call to allow for further discussion and input. However, should the CCWG determine that additional engagement with other experts is needed, this can be subsequently planned.

The small group of volunteers proposes the following steps in the engagement with experts:

1. Draft outreach message, including short intro to ICANN, explaining the objective of the new gTLD Auction Proceeds CCWG and request interest & availability to provide advice to help inform CCWG deliberations. This message would also request the identification of a possible conflict of interest (i.e. is the expert or his/her organization/employer likely to apply for the auction proceeds, whether the organization would potentially be interested to serve as a partner as outlined in a number of the possible mechanisms, as well as whether the expert has had previous dealings with ICANN Org). The message would include a list of questions identified for respective expert with the request to provide a written response within 3 weeks. In addition, all other questions would be provided in an annex so that the expert can also see and potentially address other questions. Target date for distribution of letters: by 19 January at the latest. Target date for responses: by 9 February at the latest.
2. Schedule dedicated calls that would allow for an exchange of views with external experts to allow for follow up on answers provided. The proposed schedule of meetings is as follows (note, the timing of the meetings may need to be adjusted depending on the availability of the external experts). If necessary, additional meetings would be scheduled:
 - a. Call with Category A Expert (Advisors/ consultants) – week of 19 February
 - b. Call with Category B Expert (Foundations – small) – week of 19 February
 - c. Call with Category C Expert (1) (Foundations – large) – week of 19 February
 - d. Call with Category C Expert (2) (Foundations – large) – week of 19 February
 - e. Call with Category D Experts (ICANN Experts) – week of 26 February

- f. Call with Category E Expert (Organizations that manage / distribute government funds) – week of 26 February
 - g. Call with Category F Expert (Organizations / foundations active in the ICANN environment) – week of 26 February
3. CCWG to compile all feedback received in order to make an assessment of which possible mechanism meets best the criteria identified by the CCWG as being most important for selecting a mechanism.

PROPOSED QUESTIONS

General questions (that apply regardless of the mechanism under consideration) and which are expected to be put forward to all experts identified:

- In addition to the possible mechanisms outlined by the CCWG, are there any other mechanisms that you would recommend for consideration? Please note that all proposed mechanisms need to meet the legal and fiduciary requirements (for further details, see [here](#)).
- What needs to be factored in and considered, noting that the available funds are a one-off allocation and as such, any mechanism is expected to be temporary?
- Are you aware of any models or mechanisms in which a third party provides an oversight role? If so, please share those examples and explain how this is budgeted for?
- Can you share best practices with regards to the evaluation of project applications?
- Would a fixed percentage, like for example 5%, for administrating the distribution of the funds be reasonable for project applications? If yes, please provide input on what percentage should apply.
- Is there any further input that you would like to provide that would facilitate the CCWG’s consideration of the different mechanisms?

Possible mechanism #1	<i>New ICANN Proceeds Allocation Department Created as part of ICANN Org</i>	
General description	This department would be part of ICANN Org and take full responsibility for solicitation and evaluation of proposals, and disbursement process, in accordance with the recommendations of the CCWG	
Clarifying questions and/or questions for experts	Budget / Costs 1. How do you develop and ensure that accountable practices are in place to manage both from a budget and accounting practice the auction proceeds funds in a sustainable and responsible manner? What kind of practices need to be established that are currently not in place? 2. Possible mechanism #2	<i>New ICANN Proceeds Allocation Department Created as part of ICANN Org which would work in collaboration with an existing charitable organization(s).</i>
General description	Responsibilities for solicitation and evaluation of proposals, and disbursement process would be split between the newly created department and the existing charitable organization(s).

Clarifying questions and/or questions for experts		Category or categories of experts that should be specifically asked to respond to this question:
	<ol style="list-style-type: none"> 1. What would be the benefits to working in collaboration with other organisations, if any? 2. What mechanisms would need to be in place to ensure coordination between ICANN Org Department and the existing charitable organization(s)? 3. What guidance might you share on how ICANN might collaborate with other organizations in order to achieve our desired outcomes for the use of the auction proceeds? 4. Are there any hybrid models that you are familiar with that could serve as a model for this mechanism (for example, the Stanford Engineering School Venture Fund)? 5. What are the standard practices around due diligence reviews for agreements for a hybrid model to be implemented? 6. What kind of procedures need to be in place to manage fund allocation to successful applicants? 7. What costs would be involved in creating such a structure as well as overhead expected to run such a structure? 8. In case you or your organization has knowledge and expertise in working in a hybrid model, how does your organization manage the staffing and set up when collaborating in a hybrid mechanism like this (intermediary role)? 9. In a hybrid model, what methods and consultation processes have you found effective for tracking community / stakeholder input and determining the subsequent impact of that input? 	<ol style="list-style-type: none"> 1.
