Trabajo de Seguimiento 3: conflicto de cadenas / objeciones y disputas.

Work Track 4: Internationalized Domain Names/Technical & Operations.

Trabajo de Seguimiento 4: nombres de dominio internacionalizados / técnicos y operaciones.

Work Track 5: Geographic Names at the Top-Level.

Trabajo de Seguimiento 5: Nombres geográficos en el nivel superior

Goals & Objectives

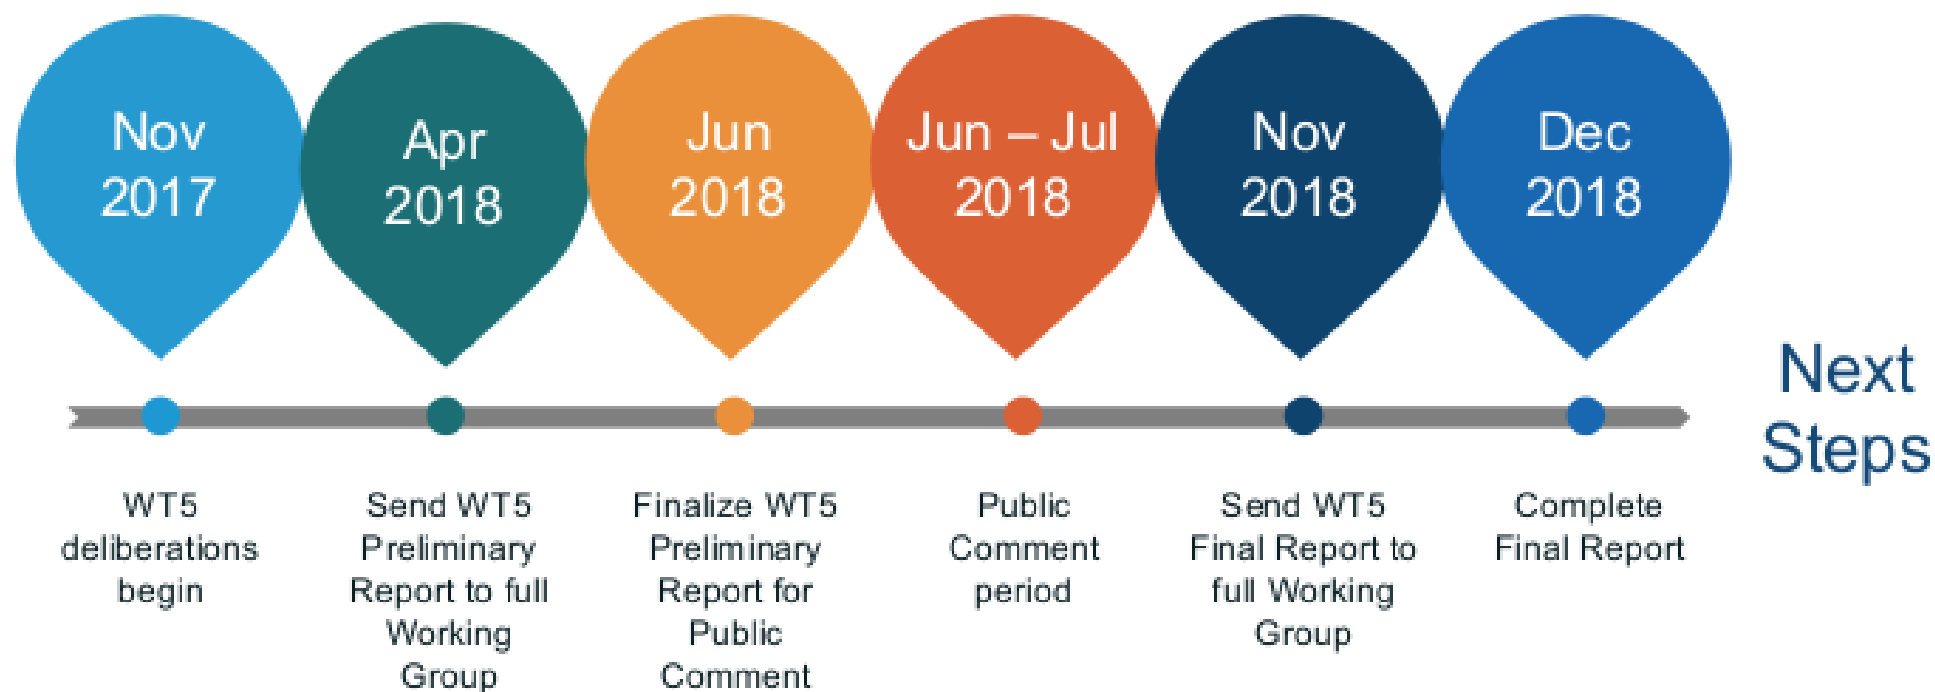

⦿ **Goals & Objectives**

- WT5 is dedicated to the singular topic of **geographic names at the top-level** and will be seeking to develop a consensus-driven set of recommendations/implementation guidance

○ **Work Track 5 (WT5) Co-Leaders**

- Christopher Wilkinson (ALAC)
- Annebeth Lange (ccNSO)
- Olga Cavalli (GAC)
- Martin Sutton (GNSO)

Timeline – WT5

- ⊙ **Problem Statement**

- Some in the community believe that the rule set for geographic names (i.e., the Applicant Guidebook, *see next slides*) **require changes, or at least consideration for change**
- There is **strong interest** within the community (e.g., **ALAC, ccNSO, GAC, and GNSO**) and efforts to date, to develop solutions for geographic names, have not been optimally coordinated

- ⦿ **Work Plan**

- Based on comments during the ICANN60 session, a risk-based approach is being considered by the leadership
- A risk-based approach would intend to:
 - Identify risks (what are we trying to prevent and why)
 - Assess these risks (impact and likelihood)
 - Apply mitigation measures commensurate to the risks
 - Review mitigation measures against existing policy and controls
