# Additional Feedback

Excellent arrangements, organization and delivery was impressive - a great learning experience. Thank you ICANN for the opportunity to attend.

A very successful GA overall.

An event which will change mindset of many.

The ebook initiative is an excellent idea and should be an always evolving one, with updates of ALS initiatives added on a regular basis.

It was great. Thank you.

As always we had too much to deal with in too little time but we did well overall.

Need to bring new ideas and technique to promote collaboration within all ALS and encourage ALS to bonding inter ALS activities.

Before devising a capacity building program, perhaps it would be nice to find out the understanding level of the participants. for example, if more than 70% have a fair understanding of the basics of iG or ICANN, the session becomes too repetitive.
