

# General Data Protection Regulation (GDPR)

Thomas Rickert  
19 February 2018

**WE ARE SHAPING THE INTERNET.**  
**YESTERDAY. TODAY. BEYOND TOMORROW.**

# Starting Date

- On May 25, 2018, the GDPR will enter into force, see Art. 99 GDPR.
- As it is a European Regulation, it will apply throughout Europe immediately from this date.
- Other than directives, a regulation does not need to be transposed into national law.

# Goals of the GDPR

The purpose of the Regulation is to regulate data protection in a uniform manner throughout the EU, to give EU citizens better control over their personal data and regulate how controllers may use personal data. On the other hand, it shall ensure free flow of personal data within the EU and to regulate the export of personal data outside the EU.

# Some of the main themes are

- increased transparency requirements (documentation, information and proof)
- increased data security requirements
- increased accountability, such as a requirement to report breaches
- right to be forgotten
- right to data portability
- privacy by default
- privacy by design

# Lawfulness of processing (Art 6 (1) GDPR)

Processing shall be lawful only if and to the extent that at least one of the following applies:

- (a) consent;
- (b) performance of a contract;
- (c) compliance with a legal obligation to which the controller is subject;
- (d) processing is necessary in order to protect the vital interests of the data subject or of another natural person;

# Lawfulness of processing (Art 6 (1) GDPR)

- (e) public interest or in the exercise of official authority vested in the controller;
- (f) legitimate interests pursued by the controller or by a third party, except where such interests are overridden by the interests or fundamental rights and freedoms of the data subject which require protection of personal data, in particular where the data subject is a child.

# JOURNEY & DATA

**WE ARE SHAPING THE INTERNET.**  
**YESTERDAY. TODAY. BEYOND TOMORROW.**

# Registry has no special Requirements
