05/30/2018 07:28:28 AM from David McAuley to All Participants:
Prof. Tushnet made an interesting takeaway in her email of last night - I will cut and paste it here in chat.

05/30/2018 07:28:46 AM from David McAuley to All Participants:
Prof. Tushnet email, in part: 'My own takeaway from the research is that the URS is generally functioning well for easy cases, but there is a serious issue of lack of reasoning and thus lack of information in a significant subset of cases. Following up on a question asked last time, Alex separated the cases by provider and found that examiners only copied and pasted in ADR Forum. All ADNDRC and MFSD cases had at least some explanation provided.'

05/30/2018 07:30:13 AM from George Kirikos to All Participants:
NAF has a history of copying/pasting, see:
http://www.circleid.com/posts/20100423_naf_copying_pasting_nonsense_into_udrp_decisions/ so I wasn't surprised by that data from Rebecca.

05/30/2018 07:31:29 AM from Georges Nahitchevansky to All Participants:

Agree with Jeff. I think just looking at data by itself does not help without a context. In particular, the data has some assumptions and coding built into it that may not be accurate. So if we are going to look at the data we need to consider Rebecca's underlying assumptions as well so we have a better sense of what the data might or might not show.

05/30/2018 07:32:30 AM from Mary Wong to All Participants:

As Berry noted, it is for the WG to decide which parts of the data, and how, is relevant to the scope of its work. Rebecca's RA has done a lot of work, but it is entirely her research that she has kindly provided to us in full. That doesn't mean it is all directly relevant to the WG's work, so that's why some of it may be very useful from the data side but perhaps not all.

05/30/2018 07:34:02 AM from Mary Wong to All Participants:

For example, some of it seems very relevant to the Documents Sub Team (which highlighted the Respondent Prevailed and Response Filed cases as the two other categories it considered may be helpful to look at).

05/30/2018 07:35:59 AM from Mary Wong to All Participants:

The other two Sub Teams may wish to see if any of the data can supplement, as quantitative measures, responses received from the Providers and/or Practitioners - since, collectively, these three Sub Teams scoped out the URS more or less.

05/30/2018 07:41:31 AM from Mary Wong to All Participants:

Berry prepared a spreadsheet for the 14 appeals that we can recirculate along with the Documents Sub Team's report.

05/30/2018 07:41:47 AM from George Kirikos to All Participants:

Good idea, Phil. Suggest that Prof. Tushnet check out record of this call, including chat, before engaging – should be helpful for those discussions
