Carlton Samuels: (11:01) Howdy all

Lisa Phifer: (11:08) Stephanie's comment: This needs to be qualified. It is unreasonable to require "enforcement" as that means total enforcement. Would suggest inserting "as required", relying on the recommendation to do risk based enforcement

Carlton Samuels: (11:09) @Susan: Could we consider combining Recs #4 & #5?

Lisa Phifer: (11:11) Recommendation #4: Conduct additional outreach and education on how to file a WHOIS inaccuracy report and what information is critical to provide

Lisa Phifer: (11:12) Recommendation #5: Publicize and encourage the use of the Bulk WHOIS inaccuracy reporting tool.

Lisa Phifer: (11:17) Recommendation #8: Direct contractual compliance to proactively monitor and enforce to address systemic issues. A risk based approach should be executed to assess, and understand inaccuracy issues and then take the appropriate compliance actions to mitigate risk in systemic complaints.

Erika Mann: (11:20) Apologies ... my previous meeting run longer.

Carlton Samuels: (11:21) Hi Erika, welcome!

Erika Mann: (11:31) Absolutely ... they can validate it but they will only do it in legal justifiable cases

Erika Mann: (11:31) ... but only in legal justifiable cases ...

Erika Mann: (11:35) Correct

Erika Mann: (11:35) Same in my case ...

Carlton Samuels: (11:40) @Aan: +1
