Lisa Phifer: (08:10) Susan, the recommendation you referred to is this one? WG Conclusion: The WG recommends⁵⁵ that P/P service customer data be validated and verified in a manner consistent with the requirements outlined in the WHOIS Accuracy Program Specification of the 2013 RAA (as updated from time to time). Moreover, in the cases where a P/P service provider is affiliated with a registrar and that affiliated registrar has carried out validation and verification of the P/P customer data, re-verification by the P/P service provider of the same, identical, information should not be required.

Susan Kawaguchi: (08:10) yes

Lisa Phifer: (08:33) Is a domain currently registered with a PP that is simply renewed still grandfathered?

Lisa Phifer: (08:39) None of these issues are recommendations at this stage

Volker Greimann: (08:40) lisa: renewal is not a trigger

Lisa Phifer: (08:40) Volker, that's not my question

Volker Greimann: (08:40) so it would be

Susan Kawaguchi: (08:41) Hi Stephanie just realized you joined

Susan Kawaguchi: (08:43) @ Lisa I will edit the Recommendation on Grandfathered domain names that is included in the Compliance section to broaden it to include all policies and all domain name registrations

Stephanie Perrin: (08:43) Sorry to be late, my own folks had a meeting

Stephanie Perrin: (08:50) Exactly, and it will be extremely ironic if accrediting drives the legitimate ones out of business and accelerates the development of methods for managing illegitimate ones (eg using stolen identities)

Stephanie Perrin: (08:54) I think you are right but whether we have voted through a mechanism I am not sure....

Lisa Phifer: (08:54) That GNSO action could be an implementation of the recommendation Alan suggested

Volker Greimann: (08:57) Maybe try to be light on the future cost burden for ICANN ;-)

Stephanie Perrin: (08:59) yes it looks like the legal budget is ballooning....:-)
