

I am Georgios TSELENTIS working as policy and programme officer for the Directorate-General for Communications Networks, Content and Technology (DG CONNECT), European Commission. I serve currently as GAC alternate for the European Commission. In the Next Generation Internet unit, we deal with funding research for the Future Internet and with Internet Governance issues where I follow and support activities like the .eu TLD, the Internet Governance Forum and relevant IG initiatives within the UN bodies e.g. the previous Working Group on Enhanced Cooperation for issues pertaining to the Internet. In the WHOIS/GDPR discussion we liaise with the other relevant Directorates like DG HOME and DG JUST within the European Commission and monitor closely the developments from the independent European Data Protection Board, composed of representatives of the European national data protection authorities and the European Data Protection Supervisor. I hope from this position being able to help this group produce a useful and timely output.

Looking forward to working with you,  
Georgios
