

I'm Matt Serlin representing the Registrar Stakeholder Group (RRSG). Apologies for missing the first call earlier today but my family and I were wrapping up some time in Yellowstone park and to say mobile reception is spotty there would be generous!

I've been involved in ICANN for about 13 years at this point. I was Chair of the RRSg several years back, participated in the IRTP working group and also was part of the negotiating team for the 2013 Registrar Accreditation Agreement which is still in place today.

I'm very much looking forward to contributing to this group and working with you all to produce a long-term WHOIS policy that strikes the right balance between the myriad viewpoints represented in this group.

Best regards,
Matt Serlin
