

Hello Kurt and ePDP Members.

I'm James Bladel, Vice President of Global Policy at GoDaddy. I've been involved at ICANN for over 10 years, and during that time I've contributed to or led several PDPs, two Review Teams, and served two terms on the GNSO Council (2 years as Chair). As a Registrar, GoDaddy manages over 75 million domain names for 18 million customers around the world. And while we started in the US, we now have a significant presence in Europe and therefore substantial exposure to GDPR. I'm hopeful that this group will move quickly and purposefully to complete its recommendations before the Temporary Spec expires, and look forward to working with everyone.
