

Hello Everyone,

I am Sebastien Ducos, one of the RySG Alternates.

I have a long background in Internet technologies tracing back 20+ years and in domain names specifically for the last 10. My first ICANN was in Toronto, 6 years ago. I am part of the Client Engagement team at Neustar working with generic, brand, geo and and country code TLD clients. I am also chair of the geoTLD.group which has been working on GDPR for the last 2.5 years when our members .frl and .amsterdam first came to us with the issue.

Looking forward to working with all of you, albeit quietly as an Alternate.

Sebastien Ducos
