

SUPER CONSOLIDATED URS TOPICS TABLE

WITH FINDINGS, ISSUES, SUGGESTIONS FROM ALL THREE URS SUB TEAMS

FOR WORKING GROUP DISCUSSION

Prepared by ICANN staff – draft as of 7 August 2018

Introduction:

Given that the approved charter for this RPM Working Group (WG) had included an unfiltered series of sometimes overlapping and unclear questions, at one point this WG had set out to refine those questions to assist its work in producing relevant policy recommendations and to identify areas where specific feedback from the community would be useful (e.g., where it was not possible to conclude specific policy recommendations).

Towards this end, the WG had agreed to seek to apply several standard “high level” questions on the basis that these questions can be used as a framework for evaluating and developing policy suggestions for the URS dispute resolution process (but noting that they may not all be applicable to each situation); those are:

- Has it been used? Why or why not?
- What was the original purpose and is it being fulfilled?
- Bearing in mind the original purpose, have there been any unintended consequences?
- What changes could better align the mechanism with the original purpose/facilitate it to carry out its purpose?
- What was the ultimate outcome?

The WG had also agreed to use the initial Consolidated URS Topics Table, which includes suggested URS review topics, the original charter questions, suggested refined/new questions, and data sources to assist the WG’s work:

https://community.icann.org/download/attachments/79432641/URS%20Docs_ICANN61.pdf?version=1&modificationDate=1520631910000&api=v2

In February 2018, the WG established three URS Sub Teams to identify address topics relating to the URS providers, practitioners, and to identify sources for related documents and to analyze those sources. This data gathering effort is based on the guidance provided in the Consolidated URS Topics Table.

The URS Providers and URS Practitioners Sub Teams were tasked to develop, administer, and analyze surveys for the current URS providers and experienced URS practitioners. In April 2018, these surveys were distributed among the target respondents; in June 2018 prior to ICANN62, responses were received.

Concurrently, the Documents Sub Team was tasked with 1) identifying various data sources (in addition to providers and practitioners) corresponding to the Consolidated URS Topics Table, 2) reviewing and examining certain categories of URS cases, and 3) developing specific potential recommendations for full WG consideration based on the survey results from providers and practitioners.

During the ICANN62 Panama Meeting, the three Sub Teams presented on the then current status of their efforts. Following ICANN62, the Providers and Documents Sub Teams continued their deliberations while the Practitioners Sub Team concluded its work. On 1 August 2018, the three Sub Teams discussed with the full WG the preliminary findings/issues that they identified, as well as proposed suggestions including draft recommendations, proposed operational fixes, questions, and action items.

This document synthesizes the three Sub Team's preliminary findings/issues, proposed suggestions, and data sources. It is organized according to the URS review topics in the initial Consolidated URS Topics Table. The WG Co-Chairs hope that this document will facilitate WG discussions concerning similar or complementary URS findings/suggestions as well as differences, including whether, and what scope/type of, guidance should be developed to improve the URS, and also open questions on which community feedback should be specifically sought. Please note that neither is the WG bound to take the proposed suggestions, nor do the proposed suggestions restrict the scope what the WG will consider as it prepares the draft Initial Report.

For the ease of reference: draft recommendations are highlighted in GREEN, suggested operational fixes in ORANGE, action items in YELLOW, and questions in BLUE within the "Proposed Suggestion" column.

For fuller details on the data collected, including the survey results, reports, and deliberations from each of the three URS Sub Teams as well as additional background (including the original URS Charter questions), please check:

Note: As of 07 August 2018, the Providers Sub Team is waiting for responses to the follow up questions/requests for the three providers and ICANN GDD based on a "[Suggested List of Issues for Discussion](#)" developed from a review of the providers' initial feedback. Therefore, additional findings/issues and proposed suggestions may be included in this document as appropriate.

ADDITIONAL SUB TEAM NOTES

Documents ST:

- There is an action item for staff (originally proposed by John McElwaine) to find out if decoding software is available that can read the coded portions of a SMD file, or if this is possible only using the specific key from the TMCH. *Comments from Co-Chairs:*
 - Do not think it is about the coding; but what is actually in the SMD file. It seems clear that the relevant info is simply not there: <http://www.trademark-clearinghouse.com/help/faq/which-information-does-smd-file-contain>
 - Much subteam spent on how to pass the full TM information to Examiners -- and if not SMD - how else?

Practitioners ST:

- Overall the Practitioner's Survey indicates that Practitioners' have a "Positive" view of the URS and find the URS to be "an effective RPM."
