

Proposed Next Steps

1. Based on today's discussion and input received, CCWG to consider whether one or more mechanisms can be deprioritized from full consideration in Initial Report. Aim to reach preliminary agreement.
2. Preliminary agreement to be confirmed through a simple ranking survey – all members and interested participants to rank 4 mechanisms in order of preference based on input received and criteria established, in view of deprioritizing bottom two mechanisms for purposes of the Initial Report. All four mechanisms will be described, but only top two will be fully detailed and highlighted as preferred mechanisms in Initial Report. To be presented as preliminary recommendation based on the best current thinking of the CCWG as well as priorities and objectives of the different Cos, but a formal consensus call will only be conducted prior to Final Report.
3. Leadership team to develop draft responses to charter questions for CCWG consideration based on deliberations to date as well as input received from external experts.
4. Leadership team to develop draft Initial Report for CCWG consideration.
5. Following CCWG review, publish Initial Report for public comment.
