

ICANN Stakeholder Analysis Tool

Dev Anand Teelucksingh, At-Large member,
Trinidad and Tobago Computer Society | 20 October 2018

ICANN	63
ANNUAL GENERAL	
BARCELONA	
20-25 October 2018	

- The At-Large Outreach and Engagement WG was looking at ways to do more effective outreach, such as :.
- Analysis of the Fellows that have passed through the Fellowship can yield persons that could be potential members of At-Large.
- How do we know where to target outreach? Where were our gaps ?
- The ALAC and ccNSO were discussing ways in which ccTLDs and At-Large members could better work together but how to find who who's what where
- For places that didn't have an At-Large presence, could other ICANN stakeholders from that country be contacted? Who were those Stakeholders?

- Past fellows were listed on separate pages. Glenn McKnight put together a spreadsheet cutting and pasting the text from these pages.
- But then how do we sort these fellows by country, etc?
- Membership information about other stakeholder groups were listed on separate pages in different ways.

Stakeholder Analysis Tool

And that led to the development of what we call the ICANN Stakeholder Analysis Tool which allows you, in one location to identify

- Who are our stakeholders in a country AND in a region
- What are the gaps in stakeholder representation in a country AND in a region.

Currently, the tool tracks, by country and by region

- At-Large Representation
- ccNSO membership
- GAC Membership
- NCUC Membership (Persons and Organisations)
- The Number of Fellowships
- Nextgen
- Accredited Registrars

Stakeholder Analysis Tool & Key Features

This tool works by collating as much as possible information from AC and SO's websites directly into the tool, meaning less manual reentering of information.

Some of the other challenges to note :

- Different AC and SOs in ICANN use different names for the same country and territory which made comparisons very difficult. The tool tries to take these differences into account
- Some AC and SO don't list the country where their members are from
- Fellowship and Nextgen continue to be in separate pages so these are still manually added.

Stakeholder Analysis Tool

A lot of time and effort has been put by me with any formal assistance over the past two years in refining this tool which helps the At-Large Community but which can also help ICANN and its multistakeholder community better understand its strengths and weaknesses.
