

Follow-up to the joint statement by ALAC and GAC (Abu Dhabi, 2 November 2017)

The At-Large Advisory Committee (ALAC) and the Governmental Advisory Committee (GAC) thank the ICANN Board for its response to their joint statement “Enabling inclusive, informed and meaningful participation at ICANN”, issued at ICANN60 in Abu Dhabi on 2 November 2017.

In its response, the Board referred to the Information Transparency Initiative (ITI), launched in January 2018, which hopefully will lead to the creation of a document managing system that – as required by the ALAC and the GAC – will allow, even to non-expert stakeholders, a quick and easy access to ICANN documents. However, its development will take time. According the ICANN website, its delivery is expected in December 2019.

In their joint statement, the ALAC and the GAC also asked ICANN to produce executive summaries, key points and synopses for all relevant issues, processes and activities – something that could be implemented without delay.

In its response, the Board referred to the current offer of monthly newsletters, pre-and post-meeting reports and video interviews, as well as to the ICANN Learn online platform. All these initiatives are commendable and likely to improve access to information and content regarding ICANN activities. However, they are not enough to reach the goal that the ALAC and GAC have in mind.

Particularly in policy development processes, non-expert stakeholders need executive summaries to be able to quickly determine, whether a particular issue is of concern to them, and if yes, to participate in the process easily and effectively, on equal footing with other stakeholders, even if ICANN is not in their full-time focus. Summaries should be provided at least, but not only, on issues put out for public comment. Clear and up-to-date information to facilitate quick understanding of relevant issues and high interest topics is key for inclusive, informed and meaningful participation by all stakeholders, including non-experts

In the context of the IANA transition process, ICANN was able to offer timely and comprehensible information by breaking down complex issues into understandable components, which allowed interaction within the entire community. The ALAC and the GAC are now asking from ICANN that the same level of effort be made and the same service be provided to the community concerning information on all other relevant issues.
