Agenda

1. Welcome, roll call, SOIs

2. SSR1 recommendations – table format

3. Set agenda for Thursday plenary meeting

4. AOB

5. Confirm action items / decisions reached

SSR1 Recommendations Table

RECOMMENDATION 1: ICANN should publish a single, clear and consistent statement of its SSR remit and limited technical mission. ICANN should elicit and gain public feedback in order to reach a consensus-based statement.
What was done to implement the recommendation?
Is the recommendation still relevant today? If not, why not?
Did the implementation have the intended effect, and how was that evaluation conducted?
If the implementation fell short of the intended effect, what should SSR2 recommend now?
