

# Review of all Rights Protection Mechanisms in all gTLDs

## PDP Home

Welcome to the online collaborative wiki workspace for the GNSO Working Group that will be conducting a Policy Development Process (PDP) to Review all Rights Protection Mechanisms (RPMs) in all gTLDs.

This PDP is being conducted in two phases, as described in the [approved charter](#): Phase One will focus on a review of all the RPMs that were developed for the 2012 New gTLD Program, and Phase Two will focus on a review of the Uniform Dispute Resolution Policy (UDRP).

This workspace will be updated continuously to reflect the status and progress of work of the PDP Working Group.

*As these wiki pages contain drafts and other work in progress, the authoritative space for all relevant resolutions, final documents, and milestone tracking can be found on the main GNSO website: see [Project Page](#) on [gns0.icann.org](#).*
