

SOI Template Improved: 23 Jan 2014

The template used to create a New GNSO Statement of Interest has just been improved by eliminating the cumbersome and confusing multi-step process to add a picture/image.

With recent revisions in the Confluence software, it is now possible to add an image while in the <Edit Contents> mode. Assuming there is an image (e.g., JPG, PNG) on one's hard drive to be uploaded, the process is simple and is described in the step instructions contained within the form itself.
