

How can I participate in this meeting?

Please take note of the following information which is designed to ensure the highest quality experience for all those attending teleconferences. It is also designed to ensure that calls start on time.

DIAL-IN Information

If you are in a country with a toll-free number (see [#Dial In Numbers](#) below), please dial in using the following Teleconference ID.

Teleconference ID English: 1638

DIAL-OUT Information

If you are in a country without a toll-free number (see [#Dial In Numbers](#) below), please use one of the following two options to receive a dial-out to you:

1. Use the form at <http://go.adigo.com/go/outlink.php?sid=7298> to request a dial out. You will then get a dial-out to attend remotely. **IMPORTANT:** please precede your country code with 011 instead of 00. The dialer will only be able to ring you if you use 011. **This facility is for use once a call has started. It will not work to schedule a dial-out in advance.**
2. You may request a dial out by sending an email to the staff@atlarge.icann.org email address. This request must be received at least 36 hours in advance of the call start time or we will be unable to process the request. If you need a last-minute dial-out, please use the URL above to request one once the conference call has started.

The operators will call those who have requested dial-outs starting approximately 10 minutes before the meeting starts. Please make sure you are ready to accept the call. If the operators have to ring you back, this will end up delaying the start time for all participants.

Interpretation on Teleconferences

If you are attending a teleconference with interpretation, be advised that the standard dial-out numbers are for English language participation. If you would like to be on non-English channel, please send an email to staff@atlarge.icann.org **at least 36 hours in advance of the start of the teleconference** and provide us with two alternative phone numbers you can be reached on and the language you wish to participate in as operators must dial out to you. If we do not hear from you we will assume that you are either not joining the call or planning to participate in English.

DO'S and DONT'S

- The audio quality of the teleconference is greatly improved if participants use landlines instead of mobile telephones. Mobile phones are also much more likely to be dropped than landlines. **Please do not participate using mobile phones except in extreme circumstances as using them is likely to degrade the quality of the teleconference for the other participants.**
- VoIP services are disruptive of line quality for everyone, even when you mute yourself. Please do not use such services - request a dial out instead.
- When you are on the call and not speaking, please use *6 to mute yourself. When ready to speak, use *7 to un-mute.
- Please preface your comments during calls with your name, especially on calls with interpretation, so that those listening in other languages know who is speaking.
- Please remember to ask for the floor before speaking, and ensure not to speak over any other person, as this will make it difficult for others to understand you.
- Please remember to speak slowly - especially on calls with interpretation - so that you can be understood by non-native speakers of your language, or so that the interpreter will be able to correctly interpret your comments for others.

If you have a Problem During a Call

- If you have a problem during the call, please use *0 on the telephone keypad to ask an operator to help you. You may also send an IM to the Adigo call operator at AOL/AIM: adigoop or skype: adigo01.
- If your line is dropped, please **do not send emails to the staff or other participants**. They are unlikely to be watching their inboxes during the call. Please instead either IM the conference operator or contact the staff on Skype, AOL IM, or Windows IM; the contact information for all staff persons is in the signatures of their emails.
- If you wish to report a problem with a dial-in number, or any other issue with the call, please send an email to staff@atlarge.icann.org and/or to support@adigo.com and tell us what the problem is so we can help to fix it.
