

# Thematic Group 5 Document Store

## Starting Documents

The documents in this section are recommended reading prior to the start of ATLAS II in order to inform participants of the work done so far.

- - [The ATLAS I Summit paper on At-Large Engagement in ICANN](#)  
Has anything changed? How much of this has been implemented?
- - [A briefing note about At-Large engagement in ICANN, drafted by Staff in 2009](#)  
Have there been improvements since then?
- - [The ATLAS I declaration which should give an idea about the format of the document we are trying to jointly put together for ATLAS II](#)
- - [The R3 paper presented to ICANN for public comment](#)
- - [The ALAC Policy Development page](#)
- - [The ATLAS II Capacity Building Webinar about policy development in ICANN](#)  
This has links to the presentation by Marika Konings but also to the recording of the Webinar. Highly recommended, as it will save SMEs & the working group a lot of time and hence provide us with more time to discuss topics
